**INDICATIONS:** Nicotinamide Tablets is indicated for use as a dietary supplement for patients who are deficient in, or who are at risk for deficiency in one or more of the ingredients in this product.

**CONTRAINDICATIONS:** This product is contraindicated in patients with a known hypersensitivity to any of the ingredients.

**PRECAUTIONS:** Large doses of Nicotinamide Tablets should be administered with caution in patients with a history of jaundice, liver disease, or diabetes. Patients with chronic liver failure and/or renal failure should exercise extreme caution in taking prescribed supplements containing copper.

Folic acid alone is improper treatment of pernicious anemia and other megaloblastic anemias where vitamin B12 is deficient. Folic acid especially in doses above 1.0 mg daily may obscure pernicious anemia in that hematologic remission may occur while neurological manifestations remain progressive
