DiOxi Star Pre-Post Activator

Claim of effectiveness.

Helps reduce the spread of organisms
which may cause Mastitis

Use Directions

USE DIRECTIONS

NOT FOR HUMAN USE

FOR EXTERNAL USE ONLY

Do not mix with any chemicals other than DiOxi Star Pre-Post Activator.

In a well-ventilated area, mix equal parts DiOxi Star Pre-Post Activator and DiOxi Star

Pre-Post Base. After mixing, the ready-to-use product will yield a 3000ppm Chlorine Dioxide solution.

Do not mix more product than will be used in 24-hours.

PRE-DIPPING: Before milking, dip or spray entire teat with this product. Wipe teats dry after

application using single-service towels to avoid contamination of milk.

POST-DIPPING: After milking, spray or dip entire teat with this product. Allow to air dry.

Note: If solution in cup becomes visibly dirty, replenish with a fresh mixture of this product. Do

not return unused product to original container.

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes.

Remove

contact lenses, if present after the first 5 minutes, then continue rinsing. Contact a physician

immediately. If swallowed: Have person sip a glass of water if able to swallow. Do not give

anything to an unconscious person. Do not induce vomiting. Contact a physician immediately.

If breathing difficulty occurs: Move person to fresh air. Contact a physician immediately.

If

on skin: Take off contaminated clothing. Rinse skin with soap and water. If irritation develops

and persists, contact a physician.

Have the product container or label with you when going for treatment, calling a physician, the emergency number listed on this label or MSDS, or a poison control center

Precautions & Hazards

Avoid eye contact. Do not ingest. Do not mix with any chemicals except as directed.

Storage

Store closed container in a cool, dry location away from sources of heat. If product becomes frozen, thaw and mix well before use.

CAUTION
KEEP OUT OF REACH OF CHILDREN
NOT FOR HUMAN USE

Always use caution when introducing
your cows to a new teat dip.

Remember these industry guidelines:

Replace dip cups and/or clean dip lines
When introducing a new dip to a dairy herd, always replace dip cups and/or brushes to prevent the new dip from mixing with the old dip. If spray or dip pumps are used, lines should be flushed with hot water to clean out any residues of the old dip.
Aproximadamente reemplazar los tazones y/o limpiar el tubo de la línea de la leche.

FIRST AID:

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present after the first 5 minutes, then continue rinsing. Contact a physician immediately. **If swallowed:** Have person sip a glass of water if able to swallow. Do not give anything to an unconscious person. Do not induce vomiting. Contact a physician immediately. **If breathing difficulty occurs:** Move person to fresh air. Contact a physician immediately. **If on skin:** Take off contaminated clothing. Rinse skin with soap and water. If irritation develops and persists, contact a physician.

Have the product container or label with you when going for treatment, calling a physician, the emergency number listed on this label or MSDS, or a poison control center.

PRECAUTION: Avoid eye contact. Do not ingest. Do not mix with any chemicals except as directed. **STORAGE:** Store closed container in a cool, dry location away from sources of heat. If product becomes frozen, thaw and mix well before use.

SEE MATERIAL SAFETY DATA SHEET

PRECAUCIÓN

MANTENGA EL PRODUCTO FUERA DEL ALCANCE DE LOS NIÑOS

NO PARA USO HUMANO

PRIMEROS AUXILIOS:

Contacto ocular: Mantenga los ojos abiertos y enjuague cuidadosamente durante 15-20 minutos. Quite los lentes de contacto, después de los primeros 5 minutos si los tiene puestos y continúe a enjuagar sus ojos. Contacte a un médico inmediatamente. **Si se ingiere:** Haga que la persona se tome un vaso de agua si puede. No le dé nada de tomar a una persona inconsciente. No induzca el vómito. Contacte a un médico inmediatamente. **Si se inhala:** Lleve a la persona al aire libre. Contacte a un médico inmediatamente. **Contacto con la piel:** Quite la ropa contaminada. Enjuague la piel con agua y jabón. Si se desarrolla y persiste la irritación, contacte a un médico.

Asegúrese de tener el contenedor o la calcomanía del producto al momento de ir por atención médica, cuando hable con el médico, cuando hable al número de asistencia que se encuentra en la hoja de información del producto o el centro de control de productos venenosos.

PRECAUCIÓN: Evite el contacto con los ojos. No ingiera. No mezcle con ningún otro producto excepto como dirigido.

ALMACENAMIENTO: Almacene en contenedores cerrados lejos de una fuente de calor. Si el producto se congela, descongélelo y agítelo antes de usarlo.

(Chem•Tel) 1-800-255-3924

aggressively remove scabs and exfoliate skin from teats

A temporary exfoliation of dead teat skin is common after new dips are introduced. Be sure to aggressively clean teats to remove exfoliated skin and clean teat ends to insure that the dead skin is removed.

Monitor cows for changes in skin condition. Many teat dips are designed with emollients and other skin conditioning ingredients to maintain healthy teat skin and fight germs. Rare teat skin reactions due to allergic or environmental conditions may occur. Closely monitor teat skin whenever a new dip is introduced. If unusual skin conditions are found, monitor closely and, if persistent, replace dip with one containing a different germicide and/or emollient formula.

**Siempre tener cuidado al usar un nuevo
sellador de pezones en las vacas.**

Tomar en cuenta las siguientes recomendaciones de la industria:

Usar tazas del sellador limpias y/o limpiar los tubos del reclador del sellador

Cuando se usa un nuevo sellador de pezones en las vacas, se deben siempre reemplazar las tazas de aplicación del sellador y también los sépilos para evitar la mezcla del sellador anterior con el nuevo. Si se usan rociadores o bombas selladoras, limpiar los tubos con agua caliente para retirar cualquier residuo del sellador anterior.

Limpia fuertemente los pezones para retirar la keratina y las escamas

Cuando se usa un nuevo sellador de pezones en las vacas, es necesario la exfoliación de las escamas que pueden formarse en la piel. Limpia bien fuertemente los pezones y extremos del pezón para eliminar las escamas en la piel.

Controlar las vacas y observar los cambios de condición de la piel

Muchos selladores de pezones contienen emolientes y otros ingredientes acondicionadores de la piel para la mantención saludable de la piel del pezón y para la destrucción de gérmenes patógenos. Ocasionalmente, se podrán producir reacciones alérgicas o ambientales por lo que se debe controlar de cerca la piel de los pezones cuando se usa un nuevo sellador. Si se presenta cualquier condición inusual persistente de la piel, reemplazar el sellador con otro que contenga una fórmula con diferente germicida o emoliente.
