WART REMOVER

Salicylic acid 1%

Wart Remover

For the removal of genital, plantar, common, and flat warts.

The common wart is easily recognized by the rough "cauli-flower-like" appearance of the surface.

The plantar wart is recognized by its location only on the bottom of the foot, its tenderness and the interruption of the footprint pattern.

For external use only.

Keep away from fire and flame.

Avoid contact with eyes. If the product gets into the eye, flush with water for 15 minutes.

Avoid inhaling vapors.

Cap the tube tightly.

Out of direct sunlight and store at room temperature away from heat.

If discomfort persists if you have diabetes or poor blood circulation.

If swallowed get medical help or contact a Poison Control Center (1-800-222-1222) right away

Wash the affected area. May soak the wart in warm water for 5 minutes. Dry area thoroughly. Using the applicator (cotton swab), apply a layer of ointment to sufficiently cover each wart. Allow it to fully absorb and cover it with a bandage as needed. Repeat this procedure once or twice daily as needed (until the wart is removed) for up to 12 weeks.

Out of direct sunlight and store at room temperature away from heat.

Water

Alcohol

Glycerin

Propylene Glycol

Dimethyl Isosorbide

Erythritol

Phenoxyethanol

Aloe Yohjyu Matsu Ekisu

Glyceryl Glucoside

Portulaca Oleracea Extract

Gentiana Scabra Root Extract

Xanthan Gum

Retinoic Acid

Dipotassium Glycyrrhizate
