

**WART REMOVER OINTMENT- salicylic acid, chlorhexidine
di(acetate) ointment
Shenzhen Hanchuan e-commerce Co., Ltd**

Wart Remover Ointment

Salicylic acid 10%

Chlorhexidine di(acetate) 2%

Wart Remover

KEEP OUT OF REACH OF CHILDREN SECTION

For the removal of genital, plantar, common, and flat warts
the common wart is easily recognized by its cauliflower-like appearance
the plantar wart is recognized by its location only on the bottom of the foot,
its tenderness and the interruption of the footprint pattern

For external use only

Keep away from fire and flame.

When using this product avoid contact with eyes. If the product gets into the eye, flush
with water for 15 minutes. Avoid inhaling vapors.

Cap the tube tightly. Out of direct sunlight and store at room temperature away from heat.

Stop use and ask a doctor if discomfort persists.

If you have diabetes or poor blood circulation.

Keep out of reach of children.

Wash the affected area. Soak the wart in warm water for 5 minutes. Dry area
thoroughly. Using the applicator (cotton swab), apply a layer of ointment to sufficiently
cover each wart. Allow it to fully absorb and cover it with a bandage as needed.

Repeat this procedure once or twice daily as needed (until the wart is removed) for up
to 12 weeks.
