WESTAGRO Bovadine

SANITIZING TEAT DIP

with 10% Glycerin

Sellador De Pezones Desinfectante Con Glicerina

ACTIVE INGREDIENT:

Iodine 1.0%

From Polyethoxy polypropoxy polyethoxy ethanol-iodine Complex

I-tech2

HIGH "FREE" IODINE TECHNOLOGY

U.S. Patent No. 5,916,581

NPE FREE Formula

ACT

ADVANCED CONDITIONING TECHNOLOGY

U.S. Patent No. 5,368,868

Manufactured by:

WESTAGRO

11100 N. Congress Ave. Kansas City, MO

64153-1296

PRODUCT BENEFITS

- Unsurpassed effectiveness as a post-dip.
- Elevated *free* iodine for fast kill of mastitis-causing organisms.
- Unique gentle formula has 10% glycerin plus cosmetic-grade complexors to help soften cracked and chapped teats.
- University tested using National Mastitis Council protocols. Proven effective in reducing the incidence of mastitis.

DIRECTIONS FOR USE:

GENERAL INSTRUCTIONS

- Use at full strength. Do not dilute.
- Consult your veterinarian before using teat dip on a cow with sore or chapped teats.
- Thoroughly clean and sanitize teat dip cup before each milking. Use fresh teat dip for each milking. Dip solution should be changed if it becomes visibly dirty, or if sediment is introduced. Do not pour used teat dip back into original container.
- Do not use Bovadine teat dip for cleaning or sanitizing equipment.

TEAT DIPPING INSTRUCTIONS

PRE-DIPPING

West Agro recommends the use of Quarter Mate sanitizing teat dip as a predip. However, if you choose to use Bovadine sanitizing teat dip:

- Make sure udder and teats are clean and dry.
- Check foremilk and udder for mastitis.

- Dip or spray cow's teats with Bovadine.
- Allow 15 to 30 seconds contact time.
- Dry cow's teats with a single-service paper towel before milking.
- Attach milker unit.

POST DIPPING

- Immediately after removing inflations, dip or spray cow's teats with Bovadine sanitizing teat dip. Do not wipe.
- If outside temperature is below freezing, allow Bovadine sanitizing teat dip to air-dry on cow's teats before cow leaves the parlor; or allow teat dip to remain on cow's teats for one minute, then dry teats with a single service paper towel. Failure to follow these directions may result in frozen teats and injured animals.
