### QUALITY CHOICE LICE TREATMENT- piperonyl butoxide, pyrethrum extract Chain Drug Marketing Association

-----

### **Quality Choice Lice treatment Kit**

#### **Active ingredient**

Piperonyl butoxide 4%

Pyrethrum extract (equivalent to 0.33% pyrethrins)

#### Uses

treats head, pubic (crab), and body lice

#### Purpose

Lice treatment

### Warnings

### For external use only

#### Do not use

- near eyes
- inside nose, mouth, or vagina
- on lice in eyebrows or eyelashes. See a doctor if lice are present in these areas.

### Ask a doctor before use if you are

• allergic to ragweed. May cause breathing difficulty or an asthmatic attack.

### When using this product

- keep eyes tightly closed and protect eyes with a washcloth or towel
- if product gets into eyes, flush with water right away
- scalp itching or redness may occur

### Stop use and ask a doctor if

- breathing difficulty occurs
- eye irritation occurs
- skin or scalp irritation continues or infection occurs

### Keep out of reach of children.

If swallowed, get medical help or contact a Poison Control Center right away.

### Directions

- Important: Read warnings before use
- Adults and children 2 years and over:

## Inspect

- check each household member with a magnifying glass in bright light for lice/nits (eggs)
- look for tiny nits near scalp, beginning at back of neck and behind ears
- examine small sections of hair at a time
- unlike dandruff which moves when touched, nits stick to the hair
- if either lice or nits are found, treat with this product

# Treat

- apply thoroughly to DRY HAIR or other affected area. For head lice, first apply behind ears and to back of neck.
- allow product to remain for 10 minutes, but no longer
- use warm water to form a lather, shampoo, then thoroughly rinse
- for head lice, towel dry hair and comb out tangles

# Remove lice and their eggs (nits)

- use a fine-tooth or special lice/nit comb. Remove any remaining nits by hand (using a throw-away glove).
- hair should remain slightly damp while removing nits
- if hair dries during combing, dampen slightly with water
- for head lice, part hair into sections. Do one section at a time starting on top of the head. Longer hair may take 1 to 2 hours.
- lift a 1-to 2-inch wide strand of hair. Place comb as close to scalp as possible and comb with a firm, even motion away from scalp.
- pin back each strand of hair after combing
- clean comb often. Wipe nits away with tissue and discard in a plastic bag. Seal bag and discard to prevent lice from coming back.
- after combing, thoroughly recheck for lice/nits. Repeat combing if necessary.
- check daily for any lice/nits that you missed
- a second treatment must be done in 7 to 10 days to kill any newly hatched lice
- if infestation continues, see a doctor for other treatments
- Children under 2 years: ask a doctor

# Other information

- do not freeze
- store at controlled room temperature 20°-25°C (68°-77°F)
- see package insert for additional information

# Inactive ingredients

ammonium laureth sulfate, fragrance, PEG-25 hydrogenated castor oil, polyquaternium-10, purified water, SD-40 alcohol

# **Consumer Information - Package Insert**

# LICE KILLING **SHAMPOO**

For the treatment of Head Lice, Pubic (Crab) Lice and Body Lice
