

NRG HEMO-STAT- aluminum chloride solution**IQ Dental Supply, LLC**

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).

DESCRIPTION:

Hemo-Stat is a topical astringent solution of Aluminum Chloride. Gingival retraction can be achieved using a plain gingival retraction cord moistened with Hemo-Stat solution.

PRECAUTIONS:

Discontinue use if irritation appears. For topical application only. Avoid eye contact.

BENEFITS:

Hemo-Stat stops gingival bleeding fast. If you should inadvertently damage the gingival margin during tooth preparation or while placing a strip, a band or a cervical matrix, moisten the area with Hemo-Stat which will control and stop bleeding quickly. Hemo-Stat contains no epinephrine. The use of vasoconstrictors for gingival retractions and bleeding is potentially dangerous and should be avoided. A plain gingival retraction cord can be dipped in Hemo-Stat solution and then placed into the gingival sulcus for its hemostatic action.

DIRECTIONS:

Soak a cotton tipped applicator with Hemo-Stat. Apply to bleeding area with pressure until bleeding is stopped. Should a small dark coagulum appear, flush it away with water. This will have no effect on hemostatic action. Remove the impregnated cord from sulcus. Flush with water and dry with air. If hemostasis is not achieved, repeat application, rinse with water and air dry until bleeding is no longer present.

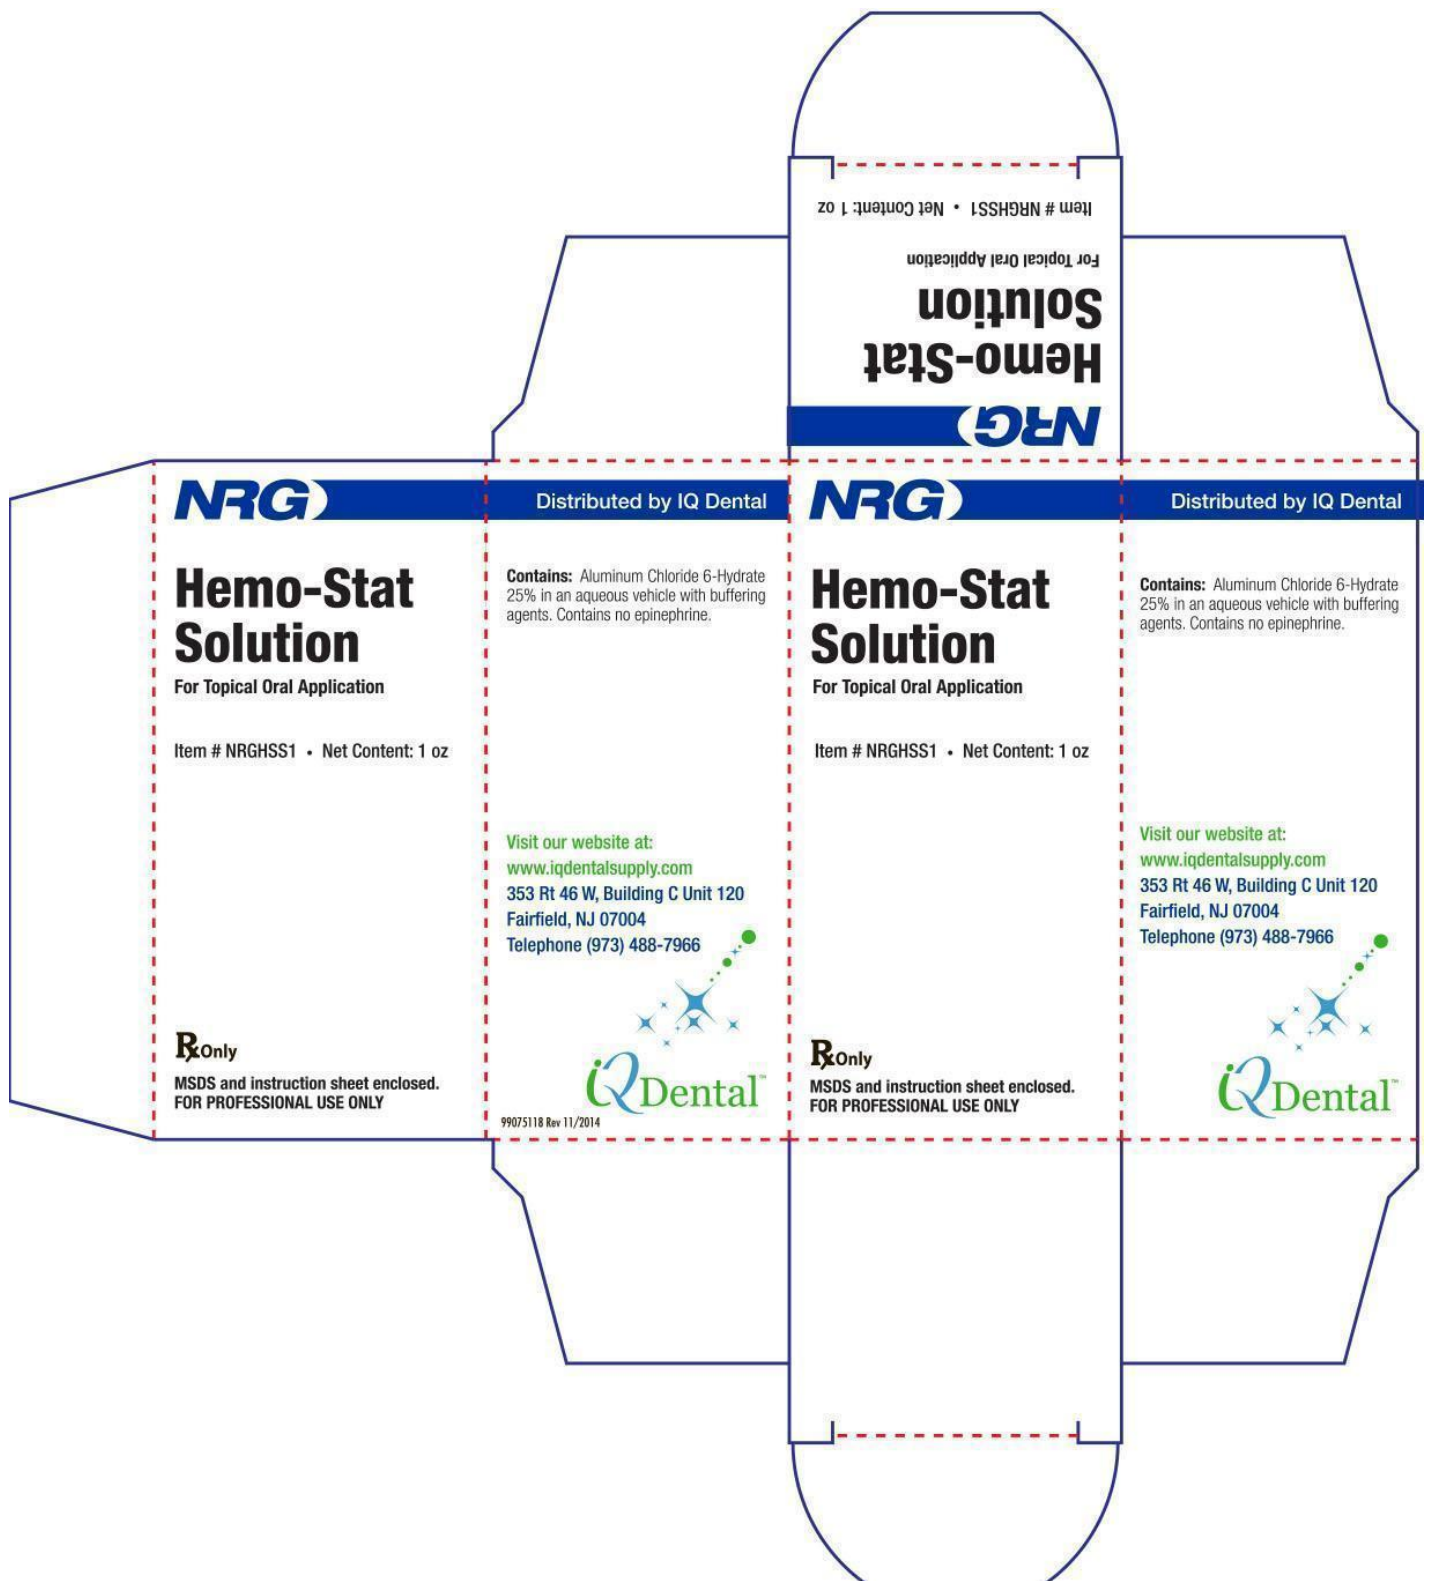

CONTRAINDICATIONS:

Do not use in patients with a known history of hypersensitivity to aluminum chloride.

CAUTION:

Keep out of reach of children.

FOR PROFESSIONAL USE ONLY.

Hemo-Stat SOLUCION HEMOSTATICA

DESCRIPCION:

Hemo-Stat es una solucion astringente a base de cloruro de aluminio. La retracion gingival puede ser lograda utilizando un hilo retractor gingival humedecido con la solucion Hemo-Stat.

PRECAUCIONES:

Descontinuar el uso de este producto en caso de irritacion. Para uso topico unicamente. Evitar contacto con los ojos.

BENEFICIOS:

La solucion Hemo-Stat paraliza la hemorragia rapidamente. Si el margen gingival es dañado durante la preparaci3n de la pieza o mientras se coloca una banda matriz o una banda cervical, humedecer el area con

la solucion Hemo-Stat la cual controlara la hemorragia inmediatamente. Hemo-Stat no contiene epinefrina. El uso de vasos constrictores para retracciones gingivales y hemorragias es potencialmente peligroso y debe de ser evitado. Un hilo retractor no impregnado se puede humedecer en la solucion Hemo-Stat y luego ser colocado en el surco gingival.

INDICACIONES:

Humedecer un isopo con la solucion Hemo-Stat. Aplicar con presion en el area de la hemorragia hasta que la misma cese. Enjuagar con agua en caso de que se forme un coagulo oscuro. Esto no tendra ningun efecto en la accion hemostatica. Remover el hilo impregnado del surco gingival. Enjuagar con agua y secar con aire. Si la hemostasis no es lograda, repetir la aplicacion, enjuagar con agua y secar

can aire hasta que la hemorragia cese completamente.

CONTRAINDICACIONES:

Este producto no debe de ser utilizado por personas hipersensitivas al cloruro de aluminio.

PRECAUCIONES:

Mantenga fuera del alcance de ni3os.
