dosage and how to use it correctly section

How to use it correctly?

- Clean your hands and treatment area thoroughly with mild soap and warm water. Gently dry them afterward.
- Apply a **thick** layer of numbing cream to the treatment area, making sure to cover both the tattooed area and its surroundings.
- Wrap the area securely with plastic wrap and leave it on for **40-50 minutes** for the best results (keeping it on longer gives better effects).
- Remove any remaining cream and wait an additional 10 minutes for the numbing sensation to reach its peak.
- Begin the procedure.

Notic: The duration of numbness may vary depending on temperature and individual skin types. It's recommended to perform a small patch test for the best numbing effect.
