DIRECTIONS FOR USE

GENERAL INSTRUCTIONS:

- Use at full strength. Do not dilute.
- Consult your veterinarian before using teat dip on a cow with sore or chapped teats.
- Thoroughly clean and sanitize teat dip before each milking.
- Use fresh teat dip for each milking. Dip solution should be changed if it becomes

visibly dirty or if sediment is introduced. Do not pour used teat dip back into original container.

• Do not use Blockade for cleaning or sanitizing equipment.

TEAT DIPPING INSTRUCTIONS:

PRE-DIPPING

 For optimal removal of organic debris and to remove any residual Blockade film, use Quarter Mate sanitizing teat dip or IodoZyme liquid teat dip concentrate. Follow label directions.

POST DIPPING

- Immediately after removing inflations, dip or spray cow's teats with Blockade. Do not wipe.
- If outside temperature is below freezing, allow Blockade to air-dry on cow's teats before cow is released outside. Failure to follow these directions may result in frozen teats and injured animals.
