ANTIMICROBIAL LOTION SOAP JABÓN LÍQUIDO ANTIBACTERIANO

**For general handwashing and germ killing
Para el lavado de las manos en general y para matar gérmenes**

Alert: Open refillable reservoir dispensers are susceptible to microbial contamination even when using antimicrobial soaps. Ideally, liquid products should be dispensed from closed, SANITARY SEALED™ refills. Open refillable reservoir dispensers should be washed and sanitized before every refilling. Soap should not be added to a partially empty dispenser as this practice of "topping off" may lead to bacterial contamination of soap and compromise the beneficial effect of hand cleaning.

Alerta: Los dispensadores de relleno son susceptibles a la contaminación microbiana, incluso al utilizar jabones antimicrobianos. De preferencia, los productos líquidos deben dispensarse de envases sellados SANITARY SEALED™. Los dispensadores de relleno deben lavarse y desinfectarse cada vez antes de recargarlos. No debe agregarse jabón a un dispensador parcialmente vacío, porque esta práctica de "rellenar" puede causar la contaminación bacteriana del jabón y comprometer el beneficio del lavado de manos.
