Aggressivery remove notation and expensive sour from coats.

A temporary enfoliation of dead test skin is common after new dips are introduced. Be sure to aggressively dean tests to remove exfoliated skin and clean test ends to insure that the dead skin is removed.

Monitor cows for changes in skin condition Many test dips are designed with emoliants and other skin conditioning ingredients to maintain healthy test skin and fight germs. Rare test skin reactions due to allergic or environmental conditions may occur. Closely manitor test skin whenever a new dip is introduced. If unusual skin conditions are found, monitor dosely and, if persistent, replace dip with one containing a different germicide and/or emoliant formula.

Siempre tener cuidado al usar un nuevo sellador de pezones en las vacas.

Tomar en cuenta las siguientes recomendaciones de la industria:

Usar tazas del sellador limpias y/o limpiar los tubos del rociador del sellador Cuando se usa un nusvo sellador de pezones en las vezas, se deben siempre reamplezar las tazas de aplicaci del sellador y tembién los sepillos pare evitar la mezda del sellador anterior con el nuevo. Si se usan rociador o bombas selladoras, limpiar los tubos con agua caliente pare retirar cualquier residuo del sellador anterior.

Limplar fuertemente los pezones para retirar la keratina y las escamas Cuando sa usa un nuevo sellador en las vecas, es necesario la exfolación de las escamas que pueden formarse en la piel. Limplar bien fuertemente los pecomes y extremos del pezón para eliminar las escamas en la piel.

Controlar las vacas y observar los cambios de condición de la piel

Controlar las vezca y observar los cambios de cendicion de la pies Muchos selladores de pazones contienen emclientes y otros ingredientes acondicionadores de la piel para la mentención seludable de la piel del pezón y para la destrucción de gérmenes patógenos. Ocasionalmente, si podrían producir reacciones alérgicas o ambientales por lo que se debe controlar de carra la piel de los pezones cuando se use un nuevo sellador. Si se presente cuanquier condición insusal persistente de la piel, reemplaza el sellador con otro que contenga una fórmula con diferente germicida o emotiente.
