

FOOT DEODORANT- foot deodorant spray patch

Guangzhou Baishili Trading Co., Ltd

Health care function

Remove foot odor

Usage

Here are the general steps for using an athlete's foot spray:

Clean Your Feet: Before using the spray, thoroughly wash your feet with warm water, especially between the toes. Dry your feet well with a towel.

Apply Evenly: Shake the spray well and hold it about 10-15 cm away from your feet. Spray evenly on the affected areas, including between the toes. Avoid direct contact of the spray nozzle with the skin.

Let It Dry: After applying, allow your feet to air dry or gently pat them dry. Avoid putting on socks or shoes immediately to ensure full absorption.

Use Daily: Follow the product's instructions—usually, applying 1-2 times daily for several days will provide the best results.

Maintain Foot Hygiene: During treatment, keep your feet clean and dry, avoid wearing wet or non-breathable shoes, and wear clean socks to help prevent recurrence.

Be sure to read the product's instructions carefully, and follow any specific recommendations to avoid overuse or skin irritation.

Matters needing attention

Here are some precautions for using athlete's foot spray:

Avoid Contact with Eyes and Mucous Membranes: Take care not to spray near the eyes, mouth, or other mucous membranes. If contact occurs, rinse thoroughly with water.

Keep Away from Flames: Many sprays contain flammable ingredients, so use them away from open flames or high heat to prevent accidental fire.

Perform a Patch Test: Before first use, apply a small amount on the wrist or inner arm to check for any irritation or allergic reaction. Discontinue use if discomfort occurs.

Do Not Apply on Broken Skin: If there are open wounds or severe infections, avoid spraying directly on the area to prevent pain or worsening infection.

Caution for Pregnant Women and Children: Pregnant or breastfeeding women and young children should consult a doctor before using the spray.

Proper Storage: Store the spray in a cool, dry place, out of the reach of children, and away from direct sunlight.

Complete the Recommended Course: Even if symptoms improve, continue using the

spray for the full course as directed to prevent recurrence.

Following these precautions can help ensure safe and effective use of the athlete's foot spray.

Unsuitable people

Caution for Pregnant Women and Children: Pregnant or breastfeeding women and young children should consult a doctor before using the spray.

Keep out of reach of children.

Proper Storage: Store the spray in a cool, dry place, out of the reach of children, and away from direct sunlight.
