Warnings

Reye's Syndrome

Children and teenagers who have or are recovering from chicken pox or flu-like symptoms should not use this product. When using this product, if changes in behaviour with nausea and vomiting occur, consult a doctor because these symptoms could be an early sign of Reye's Syndrome, a reare but serious illness.

Allergy Alert

Aspirin may cause severe allergic reaction, which may include, facial swelling, hives, shock, asthma (wheezing).

Stomach bleeding warning

This product contains an NSAID which may cause severe stomach bleeding. The chance is higher if you

- Have had stomach ulcers or bleeding problems
- Take blood thinning (anticoagulant) or steroid drug
- Are age 60 or older
- take other drugs containing prescription or non-prescription NSAIDs (aspirin, ibuprofen, naproxen or others)
- Take more or for a longer time than directed
- Have 3 or more alcoholic drinks every day while using this product

Ask a doctor before use if

- Stomach bleeding warning applies to you.
- You have a history of stomach problems, such as heartburn
- You have asthma
- You have high blood pressure, heart disease, liver cirrhosis or kidney disease.
- You are taking a diuretic

Ask a doctor or pharmacist before use if you are

taking a prescription drug for gout, diabetes, arthritis

Directions

Do not take more than directed. See overdose warning

Drink a full glass of water with each dose

Adults and children 12 years and older

- Take 1 or 2 tablets every 4 hours or 3 tablets every 6 hours not to exceed 12 tablets in 24 hours unless directed by a doctor.

Children under 12 years

- Do not use unless directed by a doctor

Stop Use and ask a doctor if

- An allergic reaction occurs. Seek medical help right away
- You experience any of the following signs of stomach bleeding, feel faint, vomit blood, have bloody stools, have stomach pain that does not get better
- Ringing in the ears or loss of hearing occurs, pain gets worse or lasts more than 10 days, fever gets worse or lasts more than 3 days.
- New symptoms occur,
- Redness or swelling is present
- These could be signs of a serious condition

If pregnant or breast-feeding

Ask a health professional before use. It is especially important not to use aspirin at 20 weeks or later in pregnancy unless definitely directed to do so by a doctor because it may cause problems in the unborn child or complications during delivery.
