### The Secret to the Effectiveness of Pet Pain-Away™

In ancient China, cobra venom saw its primary use in the treatment of cancer and arthritis. In 1978, a purified neurotoxin from the cobra was introduced to the market as an analgesic. Cobra venom peptides provide all-natural, anti-inflammatory analgesic pain relief that is non-toxic, non-narcotic, non-addictive, non-steroidal and containing no aspirin or acetaminophen. Safe to use without a prescription. It treats conditions that cause chronic pain.
