

HAND SANITIZER- hand sanitizer patch
Guangzhou Yixin Cross-border E-commerce Co., Ltd.

Active ingredients

ALCOHOL 5%

USES

Indications: This product is suitable for general skin disinfection and helps prevent the spread of diseases caused by bacteria.

Directions:

Before use, make sure your hands are dry.

Apply an appropriate amount of this product to the palm of your hand (about one teaspoon or press the nozzle 2-3 times), rub your hands thoroughly until it evaporates completely, no need to rinse with water.

Pay special attention to the cleaning of fingertips, around nails and thumbs.

It is recommended to wait for hands to dry naturally after each use before touching food or other items.

Precautions: Avoid contact with eyes. If contact occurs, rinse immediately with clean water. For external use only, avoid children using alone.

Purpose

Reduce or inhibit microbial growth, suitable for hand disinfection, helps reduce bacterial transmission

WARNINGS

Flammability: This product is a highly flammable liquid. Keep away from fire, sparks and hot surfaces. Do not use while smoking. Store in a cool, dry place away from direct sunlight.

Risk of ingestion: If swallowed, seek medical help or contact a poison control center immediately. This product is for external use only and is not suitable for oral use.

Skin sensitivity: If erythema, irritation or other allergic reactions occur during use, please stop use and consult a doctor. Avoid contact with eyes and broken skin. If accidentally contacted with eyes, rinse with plenty of water for at least 15 minutes and consult a doctor.

Children's use: It should be used under adult supervision. Avoid children from contacting and using this product alone to prevent accidental ingestion or abuse.

Precautions for long-term use: Long-term and frequent use may cause dryness, peeling or cracking of the skin. It is recommended to use with hand cream to keep the skin healthy.

Storage conditions: Store in the original packaging and keep away from children and unauthorized personnel. Make sure the container is well sealed to prevent leakage or evaporation.

DOSAGE AND ADMINISTRATION SECTION

Applicable people: Suitable for adults and children (adult supervision is recommended, especially for children under 6 years old).

How to use:

Apply an appropriate amount of hand sanitizer to the palm of your hand (about one teaspoon or press the nozzle 2-3 times), making sure to cover all surfaces of your hands.

Rub your hands thoroughly, including between your fingers, around your nails, and on your wrists, for at least 20 seconds until the liquid evaporates completely.

No need to rinse with water.

Dosage: Adjust the amount according to the size and degree of dirtiness of your hands, but 1-2 pumps (about 2-3 ml) are generally recommended for each use. It is important to ensure sufficient coverage to achieve the best disinfection effect.

Frequency: When soap and water are not available, especially at critical moments such as after contact with public facilities, after coughing or sneezing, and before and after handling food, frequent use should be used to maintain hand hygiene.

Precautions: Avoid contact with eyes and broken skin when using. If the above situation occurs, rinse immediately with clean water and consult a doctor. If any discomfort occurs, such as rash or allergic symptoms, stop using.

DO NOT USE SECTION

Contraindications: This product is for external use only. Oral administration is strictly prohibited. If swallowed, seek medical help or contact a poison control center immediately.

Allergic reactions: Do not use if you are allergic to any of the ingredients in this product. If rash, itching or other allergic symptoms occur, stop use and consult a doctor.

Use on broken skin: Avoid direct use on obvious wounds, abrasions or other forms of broken skin to prevent irritation or discomfort.

Eye use: Do not contact hand sanitizer with eyes. If it accidentally enters your eyes, rinse immediately with plenty of water for at least 15 minutes and seek medical help as needed.

High temperature environment storage: Do not store hand sanitizer in an extremely high temperature environment (for example, in direct sunlight such as in a car), as this may cause the container to swell or even rupture, and may affect the quality of the product.

your hands or feet swell

scalp irritation or redness occurs

unwanted facial hair growth occurs

you do not see hair regrowth in 4 months

May be harmful if used when pregnant or breast-feeding.

Keep out of reach of children, If swallowed, get medical help or contact a Poison Control Center right away.

WHEN USING SECTION

Avoid contact with eyes and mucous membranes: When using hand sanitizer, be careful not to let it come into contact with eyes, mouth or other mucous membranes. If contact occurs, rinse immediately with plenty of water and seek medical help as needed.

Keep away from fire and heat sources: Since most hand sanitizers contain flammable ingredients such as alcohol, please keep away from open flames, sparks and hot objects during use. Wait for hands to be completely dry after use before engaging in activities that may involve fire or heat sources.

Child supervision: When children use hand sanitizer, they must be supervised by an adult to prevent accidental ingestion or improper use. Teach children the correct method of use and explain its importance and safety.

Keep the container sealed and out of reach of children: After use, make sure the bottle cap is tightly closed to reduce evaporation and prevent accidental leakage. Store hand sanitizer where children cannot easily reach it to prevent accidental ingestion.

Use in moderation: Although using more hand sanitizer may seem to be cleaner, in fact, only the recommended dosage is needed to effectively disinfect hands. Excessive use is not only wasteful, but may also cause dryness or irritation of the skin.

Take care of your skin: Frequent use of hand sanitizer may cause dry skin. It is recommended to use moisturizer regularly to maintain skin health, especially in winter or if you have skin sensitivity.

STOP USE

Skin allergy or irritation: If you experience rash, redness, itching, swelling, pain or any other form of skin irritation during use of this product, please stop using it immediately and consult a doctor.

Handling after ingestion: This product is for external use only and is strictly prohibited for oral administration. If swallowed accidentally, please stop using it immediately and seek medical help or contact a poison control center.

Eye discomfort: If hand sanitizer accidentally comes into contact with your eyes and you still feel persistent discomfort or blurred vision after rinsing, please stop using it and seek medical attention as soon as possible.

Signs of infection: If there are open wounds or signs of infection on your hands (such as pus secretion, extreme redness and swelling, etc.), please avoid using hand sanitizer directly on the injured area and consult a professional medical staff.

Any other abnormal reactions: If the user has any unusual reaction to this product, including but not limited to systemic reactions such as difficulty breathing and dizziness, they should stop using it immediately and seek emergency medical help.

KEEP OUT OF REACH OF CHILDREN.

Storage location: Please place this product in a high place or locked in a safe place where children cannot reach it to prevent children from taking it by themselves.

Ingestion treatment: If a child accidentally swallows the hand sanitizer, please stop using it immediately and seek medical help or contact the poison control center. Even if there are no symptoms of discomfort, you should consult a professional.

Educate children to use it correctly: Educate children that hand sanitizer is only used for

hand cleaning and disinfection, not food or toys, and should be used under adult supervision.

Emergency contact information: In the event of any accident, please prepare the contact number of the local poison control center or other emergency contact information to get help quickly.
