Uses

Mucinex Fast-Max Day Cold & Flu

- temporarily relieves these common cold and flu symptoms:
  - cough
  - nasal congestion
  - minor aches and pains
  - sore throat
  - headache

    - stuffy nose
    - sinus congestion and pressure
- temporarily reduces fever
- helps loosen phlegm (mucus) and thin bronchial secretions to rid the bronchial passageways of bothersome mucus and make coughs more productive

Mucinex Nightshift Night Severe Cold & Flu
- temporarily relieves these common cold and flu symptoms:
    - cough
    - nasal congestion
    - minor aches and pains
    - sore throat
    - headache
    - sneezing
    - sinus congestion and pressure
    - runny nose
    - itching of the nose or throat
    - itchy, watery eyes due to hay fever
- temporarily reduces fever
- controls cough to help you get to sleep

Warnings

Liver warning

This product contains acetaminophen.

Severe liver damage may occur if you take:
- more than 4,000 mg in 24 hours, which is the maximum daily amount
- with other drugs containing acetaminophen
- 3 or more alcoholic drinks daily while using this product

Allergy alert

Acetaminophen may cause severe skin reactions.

Symptoms may include:
- skin reddening
- blisters
- rash

If a skin reaction occurs, stop use and seek medical help right away.

Sore throat warning

If sore throat is severe, persists for more than 2 days, is accompanied or followed by fever, headache, rash, nausea, or vomiting, consult a doctor promptly.

Do not use
- with any other drug containing acetaminophen (prescription or nonprescription). If

you are not sure whether a drug contains acetaminophen, ask a doctor or pharmacist.
- if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric, or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.

Ask a doctor before use if you have
- liver disease
- heart disease
- diabetes
- high blood pressure
- thyroid disease
- glaucoma ***(Nightshift Night Severe Cold & Flu only)***
- trouble urinating due to an enlarged prostate gland
- a breathing problem such as emphysema or chronic bronchitis ***(Nightshift Night Severe Cold & Flu only)***
- persistent or chronic cough such as occurs with smoking, asthma, chronic bronchitis, or emphysema
- cough that occurs with too much phlegm (mucus)

Ask a doctor or pharmacist before use if you are
- taking the blood thinning drug warfarin
- taking sedatives or tranquilizers ***(Nightshift Night Severe Cold & Flu only)***

When using this product
- **do not use more than directed**
- excitability may occur, especially in children ***(Nightshift Night Severe Cold & Flu only)***
- marked drowsiness may occur ***(Nightshift Night Severe Cold & Flu only)***
- alcohol, sedatives, and tranquilizers may increase drowsiness ***(Nightshift Night Severe Cold & Flu only)***
- avoid alcoholic drinks ***(Nightshift Night Severe Cold & Flu only)***
- use caution when driving a motor vehicle or operating machinery ***(Nightshift Night Severe Cold & Flu only)***

Stop use and ask a doctor if
- nervousness, dizziness, or sleeplessness occur
- pain, nasal congestion, or cough gets worse or lasts more than 7 days
- fever gets worse or lasts more than 3 days
- redness or swelling is present
- new symptoms occur
- cough comes back, or occurs with fever, rash, or headache that lasts. These could be signs of a serious condition.

If pregnant or breast-feeding, ask a health professional before use.

Keep out of reach of children.

Overdose warning

Taking more than the recommended dose (overdose) may cause liver damage. In case of overdose, get medical help or contact a Poison Control Center right away. Quick medical attention is critical for adults as well as for children even if you do not notice any signs or symptoms.

Directions
