WITH MOISTUREZYME PROTECT & HYDROLYZED HIBISCUS ESCULENTUS EXTRACT

Meant for daily use for everyday life.
 Exposure to the sun's aging UVA and burning UVB rays is the number one cause of premature skin aging. It also can lead to skin discoloration, loss of skin's elasticity, and the appearance of fine lines and wrinkles. Without blocking the harmful UV rays from penetrating the skin, skin can be very negatively impacted. To combat this, Vertra has created **The Daily Driver**, a lightweight, broad spectrum SPF30. In addition to the actives in sunscreen, this SPF30 is formulated with **Moisurezyme Protect** which converts harmful oxidants into water. By creating more moisture for your skin, coupled with the properties from the **Hydrolyzed Hibiscus Esculentus Extract**, the appearance of wrinkles is lessened. The end result is healthier skin that is being protected from the harmful rays of the sun.
