CORONA UDDER BUTTER

Active Ingredient: Petrolatum 68%

Corona Udder Butter is a lanolin-enriched moisturizing ointment formulated to protect and help relieve the discomfort of chapped, sore, raw udder and teats.

For use on cattle: Udder Butter moisturizing ointment protects and helps relieve the discomfort of chapped, sore, raw udder and teats.

For use on horses and other animals: Udder Butter offers soothing protection for minor irritations, abrasions, and burns, as a hoof ointment, helps maintain hoof health, moisture balance, and suppleness

For Cattle: As in normal pre-milking sanitation, wash teats and udder thoroughly before milking to avoid residues in milk. After milking, wash with warm water, thoroughly strip out milk, pat dry with clean towel and spread Udder Butter generously over the affected area, letting the emollients remain to soothe, soften and protect.

Continue to use routinely as described, applying as needed until condition is alleviated, rawness and chapping are relieved, resiliency and comfort of teats and udder are restored.

For over 100 years, Corona products have been protecting skin and helping to restore its healthy suppleness. Udder Butter offers the best protection and soothing for raw or injured teats and udders. The smooth, easy-spreading formula lubricates and painful, cracked skin and helps aid natural healing. Massaged into the affected areas, Udder Butter eases the discomfort of sensitive skin and helps restore moisture balance to painful, parched surfaces, providing comfort and relief. Udder is especially useful in the winter months for frost protection. Udder Butter works so well that no barn should be without it!

Castor Oil, DMDM hydantoin+IPBC, Emulsifier, Fragrance, Lanolin, Neatsfoot Oil

Caution: If conditions persist or become worse, or in case of deep wounds, or serious burns, consult your veterinarian
