-----  
Salicylic acid 8%

skin tag remover

for removal of common and plantar warts.

the common wart is easily recognized by the rough cauliflower-like appearance of the surface.

the plantar wart is recognized by its location only on the bottom of the foot, its tenderness, and the interruption of the footprint pattern.

@If you have diabetes @If you have poor circulation on irritated skin or any area that is infected or reddened on moles, birthmarks, warts with hair growing out of them, genital warts, or warts on the face or mucous membranes @When using this product, if product gets in eyes, flush with water for 15 minutes @Do not inhale vapours @Discontinue use and consult a doctor if discomfort persists @Keep out of the reach of children @If swallowed, seek medical attention or contact a poison control centre immediately

For external use only - When using this product - skin irritation and dryness may occur if you use other topical acne medications at the same time or immediately following use of this product.

Directions: @Wash the affected area @Soak the wart in warm water for 5 minutes and dry it thoroughly @Apply one drop at a time with the applicator to cover each wart completely @Allow to dry @Use self-adhesive cushioning pads to cover the wart if desired @Repeat this process once or twice daily as needed, for up to 12 weeks, until the wart is removed (Note: For external use, and can not be applied to healthy skin)

Keep out of reach of children.

If swallowed, get medical help or contact a Poison Control Center right away.
