

BULPOL SMOKING PATCHES- menthol liquid
Jiashen International Trade Limited

menthol

Stop smoking aid

reduces withdrawal symptoms, including nicotine craving, associated with quitting smoking

If you are pregnant or breast-feeding, only use this medicine on the advice of your healthcare provider. Smoking can seriously harm your child. Try to stop smoking without using any nicotine replacement medicine. This medicine is believed to be safer than smoking. However, the risks to your child from this medicine are not fully known.

Ask a doctor or pharmacist before use if you are using a non-nicotine stop smoking drug or taking a prescription medicine for depression or asthma. Your prescription dose may need to be adjusted.

Keep out of reach of children and pets.

Used patches have enough nicotine to poison children and pets. If swallowed, get medical help or contact a Poison Control Center right away. Save pouch to use for patch disposal. Dispose of the used patches by folding sticky ends together and putting in pouch.

If you smoke 10 or less cigarettes per day, do not use STEP 1 (21 mg). Start with STEP 2 (14 mg) for 6 weeks, then STEP 3 (7 mg) for 2 weeks and then stop. Steps 2 and 3 allow you to gradually reduce your level of nicotine. Completing the full program will increase your chances of quitting successfully. Apply one new patch every 24 hours on skin that is dry, clean and hairless. Save pouch for disposing of the patch after use. Remove backing from patch and immediately press onto skin. Hold for 10 seconds.

STEP 1

Use one 21 mg patch/day

Weeks 1-6

STEP 2

Use one 14 mg

patch/day

Weeks 7-8

STEP 3

Use one 7 mg

patch/day

Weeks 9-10

Active ingredients: ethylene vinyl acetate-copolymer, polyisobutylene and high density polyethylene between clear polyester backings
