

WCTNGO FUNGAL NAIL TREATMENT SWABS- tolnaftate,undecylenic acid liquid
Shenzhen Boyimei Technology Co., Ltd.

85992-003 WCTNGO Fungal Nail Treatment Swabs

Tolnaftate 1%

Undecylenic Acid 25%

Anti-fungal

Antifungal treatment for fingernails, toenails, and surrounding skin. Effective against fungal nails, athlete's foot, tinea manuum, and ringworm caused by fungi. Addresses nail fungus, discoloration, thickening, splitting, and crumbling.

Keep away from fire and flames

Keep out of reach of children

For external use on nails and the immediately adjacent skin only

Do not use if you experience any signs of sensitivity or irritation

Not for use in the eyes, mouth, or vaginal area

If the area of application shows increased irritation

If there is no improvement within 8 weeks

If pregnant or breastfeeding

If accidental ingestion occurs, seek medical assistance or contact a
Poison Control Center immediately

Wash the affected area and dry thoroughly.

Snap off the tip of the swab below the red line. Liquid will begin flowing into the other end of the swab tip.

The swab applicator allows for easy application to the skin around the nail.

Apply a thin layer of liquid over the affected area twice daily (morning and night) or as directed by a doctor.

Supervise children in the use of product.

Pay attention to the spaces between the toes. Wear well-fitting ventilated shoes, and change shoes and socks at least once daily.

Allow the nail and surrounding areas to dry.

Use only one swab per treatment.

Please continue to use this product for at least 4 weeks.
