Athlete's Foot/Jock Itch CONTROL

CONTROL DRUG FACTS

Active Ingredients

Hydrocotyle Asiatica^{} 30C* - Remedy for Itchy Skin *Silicea^{*} 8X* - Anti-Fungal Remedy *Thuja Occidentalis^{*} 30C* - Remedy for Fungal Related Ailments * USDA Certified Organic

Also Contains

Sesame Oil*, Rose Geranium Oil*, Tea Tree Oil*, Clove Oil*

Indications

For the treatment of athlete's foot (tinea pedis) and jock itch (tinea cruris). Relieves burning feet associated with athlete's foot and relieves the itching, burning, and irritation associated with jock itch.

Directions

Shake well before use. Clean the affected area and dry thoroughly. Apply a thin layer of product over the affected area 3 times daily. Supervise children in the use of this product. For athlete's foot: Pay special attention to spaces between the toes; wear well-fitting, ventilated shoes, and change shoes and socks at least once daily. Use daily for 4 weeks. For jock itch, use daily for 2 weeks. Not to be used for diaper rash. If condition persists longer, consult a doctor. For children under 2 years of age, consult a doctor before use.

Warnings

Some individuals may be sensitive to essential oils. Begin with a small drop to determine if the product causes any increased redness or irritation and discontinue use if it irritates your skin. **For external use only.** If accidental ingestion of more than several drops, and adverse reaction occurs, get medical help or contact a Poison Control Center. Do not apply to the eyes. If you are pregnant or breast-feeding, ask a health professional before use. Not for use on children under the age of 2 without physician direction.

Keep all medicines out of the reach of children.

Stop use and consult a doctor if condition worsens, or consult a doctor if symptoms show no improvement after 7 days.

Tips For Use

The amount of time to eliminate a fungal infection can range from 1-2 weeks for mild cases, up to several months for moderate to severe infections. The main factors that determine how long the treatment will take include:

- The location of the fungus Athlete's foot typically has a longer healing time than jock itch as shoes and socks provide a warm/wet environment for the fungus to live.
- The strength of the individual's immune system A strong immune system will likely shorten the healing process.
- How long the fungus has been there The longer the symptom has been present the longer the treatment will take.
- Your application schedule Athlete's Foot/Jock Itch Control should be applied at least 2-3 times every day.
- The environment in which the fungus lives Fungus thrives in warm/wet environments and allowing the area to dry out between applications can reduce the time it takes to remove the infection.
