Experience fast relief from itchy, puffy, red or watery eyes typically caused by pet dander, hair, pollen, dust and hay fever. You don't have to suffer through allergy symptoms another day longer. Itchy eyes can negatively affect your vision, focus and even work performance.

Diphenhydramine HCL helps reduce and relieve congestion of your nose, sinus and throat to help you breathe better and deeper. The antihistamine effects of this over the counter medication can help reduce the symptoms of the common cold like a runny nose, coughing or sneezing.

Allergy symptoms can make your whole day miserable, but they can also affect your sleep. The antihistamine response may naturally cause drowsiness in both adults and kids, so it is often taken in the evening or before bed to help you fall asleep faster and stay asleep
