

**TAGRID ANTIFUNGAL JOCK ITCH CREAM NON-STEROIDAL CLOTRIMAZOLE 1%-  
clotrimazole cream  
TAGRID LLC**

-----

**Active ingredient:**

1. Clotrimazole 1%

**1. Antifungal**

Uses:

- Relieves itching, burning, and scaling associated with jock itch.
- Helps soothe and protect skin recovery in affected areas.

For external use only.

**Do not use:**

- On broken, inflamed, or severely irritated skin.

When using this product

- Avoid contact with eyes. If contact occurs, rinse thoroughly with water.

Stop use and ask a doctor if

- Irritation or rash develops.
- Condition does not improve within 2 weeks of regular use.

Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.

**Directions**

- Clean and dry the affected area before application.
- Apply a thin layer of cream to the affected area twice daily (morning and night).
- Use daily for 2 weeks.
- Supervise children in the use of this product.

**Explanation of Ingredient Names on Packaging**

In the ingredient list on the packaging, we have used common names or more easily recognizable terms for the plant-based ingredients to ensure better understanding for consumers. These are names that are typically used in everyday language or in the market, making it easier for the general public to identify the contents.

However, the scientific or botanical names (also known as Latin names or academic names) are used in official databases and scientific research. These scientific names are internationally recognized and used in research, regulatory documents, and in the field of pharmacology for precise identification of ingredients.

The following is a comparison between the packaging ingredient names and their corresponding scientific names:

- **Radix Lithospermi** corresponds to **LITHOSPERMUM ERYTHRORHIZON ROOT**
- **Viola yedoensis** corresponds to **VIOLA PHILIPPICA WHOLE**
- **Dendranthema indicum** corresponds to **CHRYSANTHEMUM INDICUM FLOWER**

- **Rhinacanthus nasutus (L.) Kurz** corresponds to **Rhinacanthus Nasutus Leaf**
- **Fructus Kochiae Scopariae** corresponds to **BASSIA SCOPARIA FRUIT**
- **Mentha haplocalyx Briq.** corresponds to **MENTHA ARVENSIS LEAF OIL**
- **Tea tree essential oil** corresponds to **TEA TREE OIL**
- **Olive oil** corresponds to **OLIVE OIL**

These common names are used for packaging purposes and are intended to ensure the ingredients are easily understood by consumers. However, both the scientific names and common names represent the same ingredients, and both are used interchangeably based on the context.
