Why use UVA + UVB Protection?

Unprotected exposure to the sun can lead to UV-induced skin damage. UVB rays mainly cause burning while UVA rays can cause an alteration to the skin structure leading to wrinkles, loss of firmness and the appearance of age spots. To help protect against both UVB and UVA rays, it is important to use a sunscreen that provides broad spectrum UVA + UVB protection.

This product provides broad spectrum UVA + UVB protection in a 100% mineral (titanium dioxide) sunscreen that is water resistant for up to 80 minutes. This ultra lightweight formula also includes a sheer tint for glowing skin. It is absorbed quickly and does not leave skin feeling sticky or greasy.
