

BOVADINE A- iodine solution solution
West Agro, Inc.

Bovadine A

Bovadine A

Teat Disinfectant for Dairy Cows

Available Iodine Concentration at use: 1%

Contains moisturizing agent (glycerin) 10%

Net Volume

Indications

An environmentally friendly teat disinfectant produced using manufacturing technology protected under two U.S. patents. I-Tech2 technology provides rapid and strong bactericidal action. ACT technology keeps teats consistently soft.

Component (in 100g)

Amount Iodine mixture: 15.18g

Sodium iodate 0.05 g

Sodium iodide 0.17 g

Glycerin 10.03 g

Indications: Disinfection and sanitization of bovine teats.

Dosage and Administration: Pour the undiluted solution into a cup or similar container and briefly immerse teats immediately after each milking.

Precautions to Be Observed

Do not use this product for anything other than external use. Use this product only for the purposes specified under indications and effects. Follow the designated dosage and administration strictly.

Use under the guidance of a veterinarian.

Do not use metal cups as the product is corrosive.

Shake well before use. Milk and other organic matter consume available iodine and reduce the disinfecting effect. If a large amount of milk or organic matter enters the product, discard it and refill with fresh solution. Store out of reach of children. Avoid contact with foods, feed, clothing, or children's toys. Store tightly sealed, avoiding direct sunlight, high temperatures, humidity, and freezing conditions.

Do not store near fire or heat sources. If frozen, warm to room temperature and mix thoroughly before use. To avoid misuse and maintain product quality, do not transfer it

to another container. Dispose of used containers in accordance with local regulations. When discarding the product, dilute it with a large amount of water and avoid contaminating the environment or water systems. Follow local regulations for disposal.

Precautions During Use

Precautions for Users:

If hypersensitivity symptoms such as rash or itching occur, discontinue use immediately and consult a physician. Wear rubber gloves when handling the product and avoid skin contact. If the product contacts skin, rinse immediately with running water. Avoid eye contact.

If the product gets into the eyes, do not rub - rinse immediately with running water and bring the product when seeking medical attention promptly.

Avoid accidental ingestion. If swallowed, give plenty of water to induce vomiting when appropriate and seek immediate medical care.

Precautions for Cattle:

If adverse reactions occur, consult a veterinarian promptly. Hypersensitivity such as rash may occur - discontinue use if such symptoms appear. Consult a veterinarian before use if the teat has wounds or cracks. Until teats are dry after dipping, ensure the cow remains standing to prevent manure or bedding from adhering. In cold weather, teats may be at risk of frostbite; leave for approximately one minute after dipping, then wipe with a clean paper towel or dry indoors before exposure to freezing temperatures.

Other handling precautions:

Do not use this product for pre-milking disinfection. Use undiluted. Use fresh solution at each milking session. Clean non-return dip cups or other dipping equipment thoroughly before use. Clean all equipment thoroughly after use.

Use within the expiry date shown on the packaging.
