...obtain the distilled water stream from tap... and adjust it...
...specifically which lid to pan and so on... re-check tap... stream into...
operation

4. OBTAINING DIFFERENT POTENCIES

- after potentizer has completed its great number of cycles, before turning on liquid from left-hand switch on control panel to "off"
- turn off air supply valve to the potentizer
- in the presence of a witness remove 1 unit liquid into 99 parts of 95% alcohol
- record and initial in potentizer log book
- hand write remedy name and potency information on vial label
- in Medicine Room, success liquid about 30 times to arrive at e.g. 30C, 97C, 107C, etc.
- record and initial on batch record
- press "print" button on console meter
- set number of potencies you wish to run up and press "enter"
- press "reset" button to zero out counter
- turn left-hand switch to "auto"
- turn on compressed air supply valve
- press "go" button
- repeat section 4-4 until completion

3. TIME LIMITS ON PRODUCTION

- in case potentizer stops during production it may be started up again within 30 hours if stopped in the position when the full vat of liquid has been success and the cork remained closed
- to accommodate an extended shutdown period, any potency can be taken off any time by following section 4-4 and the machine can be left idle
- if 30 hours is exceeded, mean in section 4 with a previously saved liquid closest to the target potency
