# LensMate

PRESERVATIVE-FREE ARTIFICIAL TEARS

## Lubricant Eye Drops

Mild to Moderate Dry Eye Symptoms

**Clinically Proven Gel Shield**

- Stabilizes tear film
- Reduces tear evaporation
- Provides sustained hydration & comfort
- Rapid Relief

Can Be Used With Contact Lenses

0.50 FL OZ (15 mL) STERILE

Doctor-developed, clinically proven LensMate lubricant eye drops provide an advanced solution to alleviate discomfort caused by dry eyes.

The unique eye drops transform from a liquid at room temperature into a gel upon contact with body heat, forming a comfortable, lubricating, thin layer over the surface of the eye. The layer creates a shield that stabilizes the tear film reducing evaporation and the need for frequent reapplication while maintaining oxygen permeability and moderate viscosity to avoid visual disturbances after application.

Preservative-free, gentle and non-irritating, LensMate lubricant eye drops can be used while wearing contact lenses.
