For external use only. Discontinue use immediately if an allergic reaction occurs.

By forming a protective gel film on the vaginal wall, the product physically isolates the vaginal wall from external bacteria, thereby preventing the colonization of pathogenic microorganisms. It is indicated for the adjunctive treatment of chronic cervicitis and vaginitis. The product is supplied non-sterile and is for single-use only.

Clean the perineal area before use. Assume a squatting or lying position, relax your body, gently insert the applicator into the vagina, and gently dispense the gel. Use one applicator per night for a 7-day treatment cycle.
