High Mark Professional Pink Antimicrobial Lotion Soap

Active ingredient

Chloroxylenol 0.3%

Purpose

Antimicrobial

Use

Handwash to help decrease bacteria on the skin

Recommended for repeated use

Directions

Wet hands

Apply a small amount of product and work into a lather

Rinse well and dry hands completely

Inactive ingredients

Water (Aqua), Coconut Acid, Oleic Acid, Sodium Sulfate, Ethanolamine, Aloe Barbadensis Leaf Juice, Cocamide MEA, Coco-Betaine, Hydrolyzed Vegetable Protein, Propylene Glycol, Retinyl Palmitate, Tetrasodium EDTA, Tocopheryl Acetate, Zea Mays (Corn) Oil, Hydroxypropyl Methylcellulose, Fragrance (Parfum), Red 33 (CI 17200), Red 40 (CI 16035)

Warnings

For external use only

When using this product do not use in or near the eyes. In case of contact, rinse eyes thoroughly with water.

Stop use and ask a doctor if irritation or rash appears and lasts.

Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.

For general hand washing and germ killing.

Alert Open refillable reservoir dispensers are susceptible to microbial contamination even when using antimicrobial soaps. Ideally, liquid products should be dispensed from closed, SANITARY SEALED™ refills. Open refillable reservoir dispensers should be washed and sanitized before every refilling. Soaps should not be added to a partially empty dispenser as this practice of "topping off" may

lead to bacterial contamination of soaps and compromise the beneficial effects of hand cleaning.

Reorder No. OM07299 Référence No. OM07299 Codigo No. OM07299

ALERT: Open refillable reservoir dispensers are susceptible to microbial contamination even when using antimicrobial soaps. Ideally, liquid products should be dispensed from closed, **SANITARY SEALED™** refills. Open refillable reservoir dispensers should be washed and sanitized before every refilling. Soap should not be added to a partially empty dispenser as this practice of "topping off" may lead to bacterial contamination of soap and compromise the beneficial effect of hand cleaning.

ALERTA: Los dispensadores de relleno son susceptibles a la contaminación microbiana, incluso al utilizar jabones antimicrobianos. De preferencia, los productos líquidos deben dispensarse de envases sellados **SANITARY SEALED™**. Los dispensadores de relleno deben lavarse y desinfectarse cada vez antes de recargarlos. No debe agregarse jabón a un dispensador parcialmente vacío, porque esta práctica de "rellenar" puede causar la contaminación bacteriana del jabón y comprometer el beneficio del lavado de manos.

ATTENTION: Les distributeurs remplissables à réservoir ouvert sont susceptibles de subir une contamination microbienne, même lors de l'utilisation d'un savon antimicrobien. Idéalement les produits liquides doivent être distribués via des recharges scellées **SANITARY SEALED™**. Les distributeurs rechargeables à réservoir ouvert devraient être lavés et désinfectés avant chaque remplissage. Le nouveau savon ne devrait pas être ajouté dans un distributeur partiellement vide ; cela pourrait mener à une contamination bactérienne du savon et compromettre l'effet bénéfique du nettoyage des mains.
