READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE USING THIS PRODUCT

FIRST AID

Contact with product can cause irritation to eyes. Avoid contact with eyes.

If in Eyes: Flush with water. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing. Get immediate medical attention.

If Swallowed: Do not induce vomiting. If victim is fully conscious, give a cupful of water. Never give anything by mouth to an unconscious person. Get immediate medical attention.

STORAGE AND DISPOSAL

THOROUGHLY RINSE ALL MEASURING DEVICES AND STORE OUT OF REACH OF CHILDREN. Avoid contact with food or feed. Avoid storing near heat or open flame. Store at room temperature. Keep container tightly closed when not in use. If product has frozen, thaw in a warm room and shake well before use. Do not reuse empty container. Rinse empty container before disposing of in a safe manner. Do not store in direct sunlight.

CHEM-TREC EMERGENCY NUMBER 1-800-424-9300

Not For Human Use

Additional Information on Material Safety Data Sheet

GENERAL INSTRUCTIONS

- **Della Care® Enhanced Concentrate .25%** is a premium, concentrated pre and post teat sanitizer.
- Consult a veterinarian before starting or continuing to use teat dip if cow's teats are sore or chapped.
- Discard any teat sanitizing solution that becomes dirty or contaminated for any reason.
- Do not use teat dip for cleaning and/or sanitizing of dairy equipment.
- Do not pour used teat dip back into original container.
- Good dairy practices suggest the thorough cleaning and sanitizing of teats before milking to avoid contamination and assist in the control of mastitis.
- Thoroughly clean and sanitize teat dip foaming cup before each milking. Use fresh teat dip for each milking.

DILUTION DIRECTIONS:

Add 1 gallon of **Della Care® Enhanced Concentrate .25%** to 3 gallons of water and agitate until thoroughly mixed. Proper dilution of **Della Care® Enhanced Concentrate .25%** will yield a 0.25% iodine teat dip with glycerin. Failure to follow these instructions may cause injury to animals or reduce the effectiveness of the product as a teat dip.

PRE-DIPPING

- Remove excess organic debris and forestrip. (If water is used, use a minimal amount and dry thoroughly with clean, single-service paper towel before forestripping.)
- Dip or spray cow's teats with proper diluted **Della Care® Enhanced Concentrate .25%** teat sanitizer.
- Allow a 15 to 30 second contact time.
- Dry teat thoroughly with a clean, single-service paper towel.
- Attach milker unit.

POST-DIPPING

- Immediately after removing milking unit, dip teats with properly diluted **Della Care Enhanced Concentrate .25%** teat sanitizer. Apply an ample coat to each teat.
- Before exposing cows to below-freezing temperatures, the teats should be thoroughly dry to reduce the potential of frostbite. Failure to follow these instructions may result in frozen teats and injured animals.
