- On operations personnel complete disinfection with another wash with the same way.

Inactive ingredients

Disodium Phosphate, Glycerin, Monoethanolamine, N-Dodecyl Sulphate, Hidroxy Ethyl Cellulose, Purified Water

Principal Display Panel

Directions

For preoperative use on patients:

- After the skin area is shaved, wet it with water. Apply **Degasa Surgical Scrub** (1cc is enough to cover an area of 20-30 square inches), develop lather and scrub thoroughly for five minutes. Rinse off by aid of sterile gauze saturated with water. The area may then be painted with Degasa Prep Solution and allowed to dry.

For preoperative washing by operating personnel:

- Wet hands with water. Pour about 5cc (1 teaspoonful) of **Degasa Surgical Scrub** on palms and spread over both hands. Without adding more water, rub the Scrub thoroughly over all areas for five minutes. Use brush if desired.
- Clean thoroughly under fingernails. Add water and develop copious suds. Rinse thoroughly under running water. Complete the wash by scrubbing with another 5cc of **Degasa Surgical Scrub** in the same way.
