

VITAL E - 500- vitamin e injection, emulsion
Stuart Products, Inc.

Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, click here.

INDICATIONS:

VITAL E-500 is a clear, sterile, non-aqueous solution of Vitamin E for use as a supplemental source of natural-source vitamin E in cattle, sheep, and swine. Each mL provides 500 I.U. vitamin E in it's highest biologically-available form - d-alpha-tocopherol; in a proven delivery system.

Natural tocopherols can be destroyed in feedstuffs through processing, ensiling, and storage. A reduced vitamin E intake can result in marginal deficiencies that may not be visible.

Intramuscular or subcutaneous injections of VITAL E-500 offer an efficient and rapid method to increase vitamin E status of animals.

ADMINISTRATION AND DOSAGE:

Intramuscular or Subcutaneous Administration Only. May be repeated. If dose is greater than 5 mL, equally divide dose and inject at two different sites.

SUGGESTED DOSAGE:

CATTLE (Dairy and Beef)

Cows and Heifers **5-6 mL**

Calves

At Birth **2-3 mL**

At Weaning **3-4 mL**

Yearlings **4-5 mL**

SHEEP

Ewes **2-3 mL**

Lambs

At Birth: **.5-1 mL**

At Weaning **1-2 mL**

SWINE

Sows and Gilts

2 wks pre-partum **3-4 mL**

2 wks pre-breeding **3-4 mL**

Pigs

At births **.25-.50 mL**

Weaning: **1-2 mL**

CAUTION: Anaphylactoid or allergic reactions, which may result in deaths, abortion, and/or premature births, may occur in individual animals as well as entire herds. Should such reactions or hypersensitivity occur, treat immediately with injection of epinephrine and/or antihistamines.

Do Not Exceed Recommended Dosage.□

IMPORTANT: Stored between 40° to 78° F (4°-26°C). Protect from freezing.
