Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, [click here](#).

Keep away from children. Flammable liquid and vapour. Keep away from heat/sparks/open flames/hot surfaces. No smoking. Harmful in contact with skin. Causes skin irritation. May cause an allergic skin reaction. Harmful if inhaled. Keep container tightly closed. May be fatal if swallowed and enters airways. If swallowed: immediately call a poison centre or doctor. Do not induce vomiting. May cause drowsiness or dizziness. Causes damage to organs through prolonged or repeated exposure. Avoid breathing vapour/spray. Do not get in eyes, or skin or on clothing. Store locked up. Use only outdoors or in a well-ventilated area. If on skin: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing until no signs of contamination remain. Harmful/toxic to aquatic life with long lasting effects. Avoid release to the environment. Dispose of contents/container in accordance with local regulation. Causes serious eye irritation. Do not breath vapor. Wear protective gloves/protective clothing/eye protection/face protection.

Keratex Hoof Gel

Helps prevent hooves from softening in wet, muddy conditions. Regular use will assist the horse in fighting the effects of everyday life on hooves, such as climate, stabling, schooling and roadwork.

Shake Before Use. Start with a clean, dry hoof. After several applications the hoof will be easier to clean and dry as most water will run off, and what remains can be dried with a cloth. Apply to the hoof wall using a hoof brush. Start just below the coronary band and work downwards. For complete protection, apply to the sole and frog as well. Allow to dry before riding or turning out. When dry, buff with a cloth for a natural sheen.

Keratex Hoof Gel preserves moisture within the hoof at the optimum level. This maintains the flexibility of the hoof wall, heel, sole and frog of the horse's feet.

Do not use conventional hoof oils and greases with Keratex Hoof Gel. Use every 2 days except in dry conditions, when Hoof Gel can be applied every 4 days. Apply an extra coat before riding out in snow or in extremely wet, muddy conditions.

For External Use on Hooves Only.

Keep away from horse's eyes, nose and mouth. Not to be used on animals intended for human consumption.

Hoof Gel Ingredients Statement. This product contains: Stoddard Solvent (White Spirit) CAS 8052-41-3. Turpentine CAS 8006-64-2. Aluminium Stearate CAS 637-12-7.
