- avoid freezing and excessive heat above 40 °C (104 °F)
- close cap after use.

Nano 10⁺ Cellular Therapy
CMS Cell Membrane Structure

CMS Cell Membrane Structure
Nano 10⁺ Cellular Therapy

CMS stands for Cell Membrane Structure, a lipid membrane substance similar to protective layers comprising lipids in Keratin cells.

CMS penetrates in the cell membrane for preservation.

CMS a product of Dual Liposome Technology, combines liposome substances, natural lecithin, ceramide, phytosterol, squalene, cholesterol, triglyceride, linoleic acid, stabilized active agent.

CMS protects sensitive skin, heals skin from photoxydation, and improves antioxidant capabilities by penetrating Dual Liposome of MLV into skin without other emulsifying agents such as chemical substances like pre-servatives, mineral oil, artificial scents and pigments, and lanolin.

CMS is a TDDS system considering the skin activating stabilites substances based on skin physiology theory and a permeation theory based on safety.

Derma Blemish Balm
