## **Bi-Sept Base**

### **CONTENTS:**

**Active Ingredient: 0.7% Sodium Chlorite**

**INACTIVE INGREDIENTS: 99.3%**

**Net Content: 5 U.S. GAL (18.9L)**

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

### **HAZARD STATEMENT:**

Causes serious eye irritation. Causes skin corrosion.

### **PRECAUTIONARY STATEMENTS:**

**PREVENTION:** Wear protective gloves. Wear eye or face protection. Wash hands thoroughly after handling. Refer to Safety Data sheet (SDS).

### **FIRST AID**

**If in Eyes:** Flush with large volumes of water for at least 15 minutes. Call a physician immediately.

**If Swallowed:** DO NOT induce vomiting. Rinse mouth promptly, then give small amount/glass of water (4-6 oz. child / 10-12 oz. adult). Avoid alcohol. Call a physician immediately. DO NOT give anything by mouth to an unconscious or convulsing person.

**If on Skin:** Flush with large volumes of water for at least 15 minutes while removing contaminated clothing and shoes. If irritation develops and persists, get medical attention.

**Inhalation of Vapors:** If breathing difficulty or irritation occurs, remove to fresh air. If symptoms persist, get medical attention.

### **FOR ASSISTANCE WITH MEDICAL EMERGENCY**

**CALL 1-877-741-1032.**

### **FOR FARM, COMMERCIAL & INDUSTRIAL USE ONLY**

**- NOT FOR HUMAN USE**

Bi-Sept is a Trademark of GEA Farm Technologies, Inc.

Made in U.S.A.

**INDICATIONS:** This topical liquid product, when properly mixed with Bi-SEPT Activator and used undiluted as a pre and post teat dip, effectively aids in reducing the spread of

mastitis.

**DIRECTIONS FOR USE:** Use only when properly mixed with Bi-Sept Activator. Do not dilute. Always prepare mixture in a ventilated area: add ONE volume of Bi-Sept Base to ONE volume of Bi-Sept Activator to a clean container. Mix thoroughly. Once mixed, product can remain effective for up to three days. However, for optimum results, it is recommended to use each Bi-Sept Activator / Base mixture no longer than 24 hours.

**PRE DIPPING:** Before milking, dip each teat with Bi-Sept. After 15 to 30 seconds, dry each teat thoroughly with a single service towel. If the udder and teats are heavily soiled, wash with a sanitizing solution and dry before application of Bi-Sept teat dip.

**POST DIPPING:** Immediately after milking, dip each teat with Bi-Sept. Allow teats to air dry. Do not wipe. If outside temperature is below freezing, allow to air dry on the teat before the cow leaves the parlor to prevent freezing. At the end of lactation, apply this product daily for one week after the last milking. In addition, begin application of this product about one week prior to calving. If a common teat dip cup is used for application, a fresh solution should always be used at each milking. The teat dip cup should be emptied, cleaned and rinsed with potable water after each milking session or when cup becomes contaminated during milking. Do not pour remaining solution from dip cup back into original container.

#### **STORAGE INSTRUCTIONS:**

Store this product in a cool, dry area away from direct sunlight and heat to avoid deterioration. Keep containers closed to prevent contamination of this product. Keep from freezing.

#### **NPE FREE**

## MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS ADVERTENCIA

PARA USO AGRÍCOLA, COMERCIAL E INDUSTRIAL SOLAMENTE- NO PARA EL USO HUMANO

Bi-Sept es una marca registrada de GEA Farm Technologies, Inc.  
Fabricado en EE.UU.

**CONTENIDO:**  
Ingrediente activo: .....0.7% Clorito de Sodio  
Ingredientes inactivo: .....99.3%

**INDICACIONES:** Este producto líquido ayuda efectivamente a reducir la propagación de mastitis cuando se mezcla apropiadamente con Bi-SEPT Activador y se usa sin diluir como sellador de pezones después del ordeño.

**INSTRUCCIONES PARA EL USO:** Úselo solamente cuando sea mezclado apropiadamente con Bi-Sept Activador. No lo diluya.  
Siempre prepare la mezcla en un área ventilada; vierta UN volumen de Bi-Sept Activador y UN volumen de Bi-Sept Base o un equivalente líquido, se recomienda no usar una misma mezcla Activador / Base de Bi-Sept por más de 24 hrs.  
**PRE-SELLADO:** Previo al ordeño, remoje cada pezuño con Bi-Sept. Después de 15 a 30 segundos, seque completamente cada pezuño con una toalla de uso individual. Si la ubra y los pezones están muy sucios, lave con una solución sanitaria y seque antes de la aplicación de Bi-Sept.  
**POST-SELLADO:** Inmediatamente después del ordeño, remoje cada pezuño con Bi-Sept. Deje secar los pezones al aire. Si la temperatura exterior es menor que la de congelación, permita que se sequen al aire antes de que la vaca salga de la sala para evitar el congelamiento. Al final de la lactancia, aplique este producto diariamente durante una semana después del último ordeño. También, comience la aplicación de este producto aproximadamente una semana antes del parto. Si se utiliza una copa común para la aplicación del sellador de pezones, siempre se debe usar una solución fresca en cada ordeño. La copa para sellar pezones debe ser vaciada, lavada y enjuagada con agua potable después de cada sesión de ordeño o cuando se contamine durante el ordeño. No vierta la solución restante de la copa de vuelta al envase original.

**INSTRUCCIONES PARA EL ALMACENAJE:**  
Almacene este producto en un área fresca y seca, lejos de la luz solar directa y del calor para evitar la degradación. Mantenga los envases cerrados para evitar la contaminación de este producto. Evite el congelamiento.  
**LIBRE DE NPE**

Vea la etiqueta adjunta para información sobre medidas de prevención y de primeros auxilios.
