### *Just what the skin doctor ordered.®*

Ground-breaking, patent-pending solar powered technology *in lotion form* captures UV light transforming it into visible *red* light, a proven energy source for eliciting anti-aging effects on the skin.

In-office lasers, IPL (intense pulsed light) and other light treatments, used to help build collagen and elastin, are expensive and inconvenient, requiring a series of doctor's visits and maintenance sessions.

At-home red light devices are costly, difficult to remember to use as well as time consuming.

Imagine a new reality in skin rejuvenation where skin can experience continuous exposure to anti-aging red light through the mere daily application of a lotion.

DERMAdoctor® Photodynamic Therapy™ is clinically proven to improve the appearance of firmness, radiance, skin tone, elasticity, fine lines and wrinkles.

#### **How Does It Work?**

Morinda Citrifolia Extract (Noni Fruit) contains a special polyphenol that specifically captures the sun's rays then converts and emits this energy as a highly focused visible red wavelength of light (648 nm) equivalent to that of a red LED.

Binding of this polyphenol to an inert tricalcium phosphate particle creates a complex capable of transmitting the visible red light to the skin where it works to encourage the production of collagen and elastin fibers within the dermis.

***Sun may be required, but sun protection is desired!***

DERMAdoctor® believes in not only meeting but exceeding sun protection. Photodynamic Therapy™ takes sun protection to a new level with new technological advances.

This sophisticated complex also provides Vitamin D supplementation, oxidative protection and helps support a cellular DNA shield.

**Vitamin D** Photodynamic Therapy™ contains the sole non animal Vitamin D source available; sun exposed shitake mushrooms, to help boost levels of this vitamin so critical to overall well-being.

**Benzylidene Dimethoxydimethylindanone** (C<sub>20</sub>H<sub>20</sub>O<sub>3</sub>) Sunscreen booster

**Powerful Antioxidants** Pomegranate, Ubiquinone, Vitamin E, Cucumber, Green & White Tea Extracts work to fight against free radical environmental damage.

This exclusive, medically formulated and tested line of gentle and effective skin care solutions is developed by leading dermatologist Audrey Kunin, M.D.

**DERMAdoctor® Photodynamic Therapy™:**

- Utilizes UV light to revitalize the skin
- Improves skin elasticity
- Reduces the appearance of fine lines and wrinkles
- Improves skin tone and texture

*Normal daily activity will activate product. Do not seek additional sun exposure.*
