

BABY ANESTENKA- benzocaine liquid

Menper Distributors

Disclaimer: Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.

Active Ingredient

Purpose

Benzocaine 7%(w/w).....Oral Anesthetic/Analgesic

Oral Anesthetic/Analgesic

Uses temporarily relieves sore gums due to teething in infants and children 4 months of age and older.

For oral use only.

Allergy Alert: do not use this product if you have a history of allergy to local anesthetics such as procaine, butaine, benzocaine or other "caine" anesthetics.

Fever and nasal congestion are not symptoms of teething and may indicate the presence of infection. If these symptoms persist, consult your doctor or dentist. **A fever could be a sign of serious condition.**

Stop use and ask a doctor or dentist if

- oral pain does not get better in 7 days
- irritation, pain, or redness does not go away
- rash or fever develops
- redness or swelling is present

Keep out of reach of children. In case of accidental overdose, get medical help or contact a Poison Control Center right away.

Directions Do not use more than directed. Wash hands. Remove imprinted safety seal from bottle. Use your fingertip or cotton swab to apply 2-4 drops. Apply to affected area not more than four times daily or as directed by a physician. For infants under 4 months of age, there is no recommended dosage or treatment except under the advice and supervision of a dentist or physician.

Other information Store at a controlled room temperature between 15 and 30 C (59-86 F)

Tamper Evident Feature: do not use if imprinted safety seal over bottle cap is torn, broken or missing prior to opening. **Save outer carton for full instructions and warnings.**

Questions? 1-800-560-5223 M-F 9 AM to 4 PM Eastern.

Inactive ingredients Cherry Flavor, Glycerin, Menthol, Methylparaben, Propylene Glycol, Propylparaben.
