NEW FOAM FORMULA!  
FOR EFFECTIVE FLUORIDE  
TREATMENTS

For topical application to aid in the  
protection against dental cares.

LACLEDE FLUORIDE FOAM  
contains no thickening gels. The rich  
thick foam is actually a liquid which  
allows free movement of fluoride  
ions to teeth and interproximal areas.  
Because the fluoride is applied as a  
foam, the total mass of fluoride in  
the tray is actually less than gel  
applications. This means a decreased  
risk of accidental fluoride ingestion  
and systemic toxicity.
