-----  
**CPC 1000 + Pre and post teat dip**

**AIDS IN REDUCING THE SPREAD OF ORGANISMS THAT MAY CAUSE MASTITIS**

- *Fast-acting sanitizer*
- *Conditioning formula is gentle on cow's teats*

**Treats and udders should be thoroughly washed and dried before milking, using potable water, a suitable cleanser and individual paper or single use cloth towels to remove soil and to prevent contamination of milk.**

**DIRECTIONS:**

Pre and post Milking: Fill teat cup with CPC 1000. DO NOT DILUTE. Before and after each cow is milked, dip/spray the teats as far as possible into the teat dip containing CPC 1000. Wipe teat dry after dipping/spray for pre milking using single service paper towels or single use cloth towels to avoid contamination of milk. Udders and teats which are heavily soiled should be washed before using a pre-milking teat dip/spray. Teats should then be dried with a single service towel and dipped/sprayed in CPC 1000, wiping teats dry before milking.

**Post Milking Directions:** Immediately after each cow is milked, dip/spray teats in an undiluted solution of CPC 1000. Teats should be dipped/sprayed as far as possible into the teat dip containing the CPC 1000. At the end of lactation, the teats should be dipped/sprayed in CPC 1000 for four days after milking. Teats and udders should be thoroughly washed and dried before milking, using potable water and individual paper towels and or single use cloth to prevent contamination of milk. Blot dry. If the dip/spray becomes visibly dirty or contains sediment use a fresh solution of undiluted CPC 1000.

**IMPORTANT:**

Do not mix CPC 1000 with any other teat dip/spray or other products.

**NOTE:** CPC 1000 is not intended to cure or help the healing of chapped or irritated teats. In case of teat irritation or chapping have the condition examined by a veterinarian.

**Avoid freezing - if frozen, let thaw and shake thoroughly before using.**

**ACTIVE INGREDIENT:**

Cetylpyridinium Chloride Monohydrate Brand 2025-2475 ppm (6004-24-6)

**CONTAINS:** Water (97732-18-5), Glycerine (56-81-5), Cocadidopropyl Phosphatidyl PG-

Dimonium Chloride (83682-78-4), Methylene Blue (7220-79-3)

CPC 1000+ PRE AND POST TEAT DIP

AIDS IN REDUCING THE SPREAD OF ORGANISMS THAT MAY CAUSE MASTITIS

- Fast-acting sanitizer • Conditioning formula is gentle on cow's teats

Teats and udders should be thoroughly washed and dried before milking, using potable water, a suitable cleanser and individual paper or single use cloth towels to remove soil and to prevent contamination of milk.

DIRECTIONS: Pre and Post Milking: Fill teat cup with CPC 1000. DO NOT DILUTE. Before and after each cow is milked, dip/spray the teats as far as possible into the teat dip containing CPC 1000. Wipe teat dry after dipping/spray for pre milking using single service paper towels or single use cloth towels to avoid contamination of milk.

Post Milking Directions: Immediately after each cow is milked, dip/spray teats in an undiluted solution of CPC 1000. Teats should be dipped/sprayed as far as possible into the teat dip containing the CPC 1000. At the end of lactation, the teats should be dipped/sprayed in CPC 1000 for four days after milking. Teats and udders should be thoroughly washed and dried before milking, using potable water and individual paper towels and or single use cloth towels to prevent contamination of milk. Blot dry. If the dip/spray becomes visibly dirty or contains sediment, use a fresh solution of undiluted CPC 1000.

IMPORTANT: Do not mix CPC 1000 with any other teat dip/spray or other products.

NOTE: CPC 1000 is not intended to cure or help the healing of chapped or irritated teats. In case of teat irritation or chapping have the condition examined by a veterinarian.

Avoid freezing - if frozen, let thaw and shake thoroughly before using.

Los pezones y las ubres deben lavarse y secarse muy bien antes del ordeño, utilizando agua potable, un producto de limpieza adecuado y toallas de papel individuales o toallas de tela de un sólo uso para prevenir la contaminación de la leche.

DIRECCIONES: Lene la pezonera con CPC 1000. No dilua el producto. Antes de ordeñar cada vaca, sumerja o rocíe las ubres tanto como pueda en la pezonera que contiene CPC 1000. Seque las ubres con una toalla desechable después de sumergirlas o rociarlas para evitar la contaminación de la leche. Las ubres que están muy sucias deben lavarse antes con un producto en el que se sumerjam o con el que se rocíen las ubres antes del ordeño. Después de sumergirse en CPC 1000 o rociarse con este producto, se deben secar las ubres con toallas desechables antes del ordeño.

IMPORTANTE: No mezcle el CPC 1000 con ningún otro producto para sumergir o rociar las ubres.

NOTA: El CPC 1000 no fue creado para ayudar a curar ubres irritadas o agrietadas. En caso de irritación o agrietamiento de las ubres, haga que un veterinario examine la afección.

Precaución: Evite la congelación. Si se congela, deje descongelar y agite bien antes de usar.

ACTIVE INGREDIENT: Cetylpyridium Chloride Monohydrate Blend 2025-2475 ppm (6004-24-6)

CONTAINS: Water (97732-18-5), Glycerine (56-81-5), Cocamidopropyl Phosphatidyl PG-Dimonium Chloride (83682-78-4), Methylene Blue (7220-79-3)

IMPORTANT NOTICE TO PURCHASER: The manufacturer and seller warrants that the chemical contained herein conforms to its standard specifications. Seller's and manufacturers liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of the product with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of the product for his intended use, and user assumes all risk and liability whatsoever, in conjunction therewith. The manufacturer and seller make no representation or warranty, including merchantability or any other kind, express or implied. Individuals with potential allergic sensitivities shall have their physician review this or any other product before use. The foregoing may not be altered except by written agreement by officers of the manufacturer.

## CPC 1000+ PRE AND POST TEAT DIP

### AIDS IN REDUCING THE SPREAD OF ORGANISMS THAT MAY CAUSE MASTITIS

- Fast-acting sanitizer • Conditioning formula is gentle on cow's teats

Teats and udders should be thoroughly washed and dried before milking, using potable water, a suitable cleanser and individual paper or single use cloth towels to remove soil and to prevent contamination of milk.

**DIRECTIONS:** Pre and Post Milking: Fill teat cup with CPC 1000. DO NOT DILUTE. Before and after each cow is milked, dip/spray the teats as far as possible into the teat dip containing CPC 1000. Wipe teat dry after dipping/spray for pre milking using single service paper towels or single use cloth towels to avoid contamination of milk. Udders and teats which are heavily soiled should be washed before using a pre-milking teat dip/spray. Teats should then be dried with a single service towel and dipped/sprayed in CPC 1000, wiping teats dry before milking.

**Post Milking Directions:** Immediately after each cow is milked, dip/spray teats in an undiluted solution of CPC 1000. Teats should be dipped/sprayed as far as possible into the teat dip containing the CPC 1000. At the end of lactation, the teats should be dipped/sprayed in CPC 1000 for four days after milking. Teats and udders should be thoroughly washed and dried before milking, using potable water and individual paper towels and or single use cloth towels to prevent contamination of milk. Blot dry. If the dip/spray becomes visibly dirty or contains sediment, use a fresh solution of undiluted CPC 1000.

**IMPORTANT:** Do not mix CPC 1000 with any other teat dip/spray or other products.

**NOTE:** CPC 1000 is not intended to cure or help the healing of chapped or irritated teats. In case of teat irritation or chapping have the condition examined by a veterinarian.

**Avoid freezing - If frozen, let thaw and shake thoroughly before using.**
