### **INDICATIONS AND USAGE**

Thyreoidea compositum® Injection Solution is indicated for stimulation of the defense system in thyroid dysfunction, connective tissue dysfunction and glandular dysfunction.

### **DOSAGE AND ADMINISTRATION**

The dosage schedules listed below can be used as a general guide for the administration of Thyreoidea compositum® Injection Solution. Thyreoidea compositum® Injection Solution shows individual differences in clinical response. Therefore, the dosage for each patient should be individualized according to the patient's response to therapy. Adults and children 7 years and older: in acute disorders, 1 ampule per day, otherwise 1 ampule, 1 to 3 times per week IM/SC/IV>ID. Children ages 2 to 6 receive  $\frac{1}{2}$  the adult dosage.

Discard unused solution.

Thyreoidea compositum® Injection Solution may be administered intravenously, intramuscularly, subcutaneously, or intradermally. The required dose of Thyreoidea compositum® Injection Solution is first withdrawn from the ampule into the syringe, and the syringe is then shaken briefly. Thyreoidea compositum® Injection Solution should be administered using a narrow gauge needle (e.g. 22 to 30 gauge). Note: Parental drug products like Thyreoidea compositum® Injection Solution should be inspected visually for particulate matter and discoloration prior to administration whenever solution and container permit. Thyreoidea compositum® Injection Solution is a clear, colorless solution. Discolored solutions should be discarded.

### **WARNINGS AND PRECAUTIONS**

If pain persists or worsens, if new symptoms occur, or if redness or swelling is present, the patient should be carefully re-evaluated because these could be signs of a serious condition.

Pregnancy Category C. Animal reproduction studies have not been conducted with this drug. It is also not known whether this drug can cause fetal harm when administered to a pregnant woman or can affect reproduction capacity. This drug should be given to a pregnant woman only if clearly needed.
