HOMEOPATHIC MEDICINE

While HerpCare Ointment is generally well-tolerated, some individuals may experience side effects. If you notice any of the following side effects or other unusual symptoms, discontinue use and consult a healthcare professional:

- Skin Irritation: Mild to moderate irritation, redness, or itching at the application site.
- Allergic Reactions: Signs of an allergic reaction, such as rash, hives, swelling, or difficulty breathing.
- Burning Sensation: A temporary burning or stinging sensation upon application.
- Dryness or Peeling: Dryness or peeling of the skin in the treated area.
- Increased Redness: An increase in redness or inflammation of the affected area.

For Best Results:

- Hand Hygiene: Wash your hands before and after applying the ointment to maintain cleanliness and prevent the spread of infection.
- Application Timing: Apply the ointment to the affected area at the first sign of blisters, sores, or tingling sensation. Early use ensures the best results.
- Application Method: Rub the ointment in gently and thoroughly to ensure proper absorption.
- Dryness or Peeling: Dryness or peeling of the skin in the treated area.
- Frequency of Use: Use the ointment at least 4 times daily and then as needed for continued relief.
- Children: Do not use on children under 2 years of age.
- Patch Test: Perform a patch test for sensitive skin. Take a small amount of the ointment with your finger and gently apply it to a small area of the affected skin. Apply liberally and use often until symptoms subside.
- Sanitary Products: Use deodorant-free sanitary napkins or sanitary pads as needed.
- Intercourse: Try to avoid intercourse while using HerpCare Ointment to reduce irritation and transmission risk.
- Avoid Scratching: Do not scratch the affected area, as this can cause more irritation and potentially spread the virus.
- Clothing: Avoid wearing synthetic and tight underwear. Use breathable cotton underwear to keep the area ventilated.
- Drying: Thoroughly dry the genital area after showering, urination, bowel movements, or swimming, and reapply the ointment.
- Menstrual Period: HerpCare Ointment can be used during your menstrual period; it does not disrupt your pH balance.
- Medication: HerpCare Ointment can be used alongside your prescription medication, but it is not intended to replace your prescribed treatments.

Warnings:

- Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.
- For external use only.
