Key to discovering and maintaining a luminous complexion, Tri-Phasic White® Day Milk Lotion features Hexapeptide-2 and UV protection to effectively target the daytime factors that can trigger discoloration activation.

- Hexapeptide-2 helps inhibit the activation of complexion-dimming discolorations from forming so your beauty can clearly shine through.
- Also includes UVA and UVB (SPF 15) sunscreens to help prevent the most common cause of activation—ultraviolet rays—from generating an uneven skin tone.
