What is Cold Bee Gone?

Cold Bee Gone is a 100% natural remedy that includes homeopathic cold fighters, essential oils and a proprietary honey blend, including unpasteurized active Manuka Honey. It has a light, soothing citrus scent and is pleasant to use. It is simple, natural and effective.

How can it help me?

Cold Bee Gone helps your body fight illness exactly where most germs infect us, in the nasal passages. We get sick by touching contaminated surfaces and then touching our eyes, ears, nose or mouth. We can also inhale germs when standing near an infected person who coughs or sneezes. The germs are delivered to the back of the nasal passages by tiny hairs inside the nose. Once there, they begin replicating or reproducing within 3 days of exposure. It is during this phase that you stand the best chance of interrupting this process. Use Cold Bee Gone when you are in a high exposure situation or at the first signs of illness.

How do I use it?

Sometimes the answer to feeling better is as plain as the nose on your face! Use daily for general protection or up to three times daily at first sign of illness. For nasal use only.

- 1) Use fresh cotton swab
- 2) Saturate swab tip
- 3) Insert swab into nostril
- 4) Do not insert beyond cotton swab tip
- 5) Swab inside nostril in a circular motion
- 6) Repeat with fresh swab tip on other nostril
- 7) Discard swab
