Description:

One Natal RX Tablet is an orally administered prenatal/postnatal prescription folic acid-containing dietary supplement and should be administered under the supervision of a licensed medical practitioner.

DOSAGE AND ADMINISTRATION:

Before, during and/or after pregnancy, one tablet daily, with a meal, or as directed by a licensed healthcare practitioner regardless of lactation status.

WARNING:

Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.

CAUTION:

High levels of folic acid may, especially in older adults, hide signs of Vitamin B-12 deficiency (such as pernicious anemia), a condition that can cause nerve damage.

Store at 15°-30° C (59°-86° F). Protect from light and moisture. Dispense in a tight, light-resistant container. Notice: Contact with moisture may produce surface discoloration or erosion.

Call your licensed medical practitioner about side effect. You may report side effects by calling **1-877-225-6999**.
