# TEAT DIPPING INSTRUCTIONS PRE-DIPPING

West Agro recommends the use of Quarter Mate sanitizing teat dip as a predip. However, if you choose to use Bovadine sanitizing teat dip:

• Make sure udder and teats are clean and dry.

- Check foremilk and udder for mastitis.
- Dip or spray cow's teats with Bovadine.
- Allow 15 to 30 seconds contact time.
- Dry cow's teats with a single-service paper towel before milking.
- Attach milker unit.

### **POST DIPPING**

- Immediately after removing inflations, dip or spray cow's teats with Bovadine santizing teat dip. Do not wipe.
- If outside temperature is below freezing, allow Bovadine santizing teat dip to air-dry
  on cow's teats before cow leaves the parlor; or allow teat dip to remain on cow's
  teats for one minute, then dry teats with a single service paper towel. Failure to
  follow these directions may result in frozen teats and injured animals.
