Allercaine™ with Bittran II™

Hot Spot Spray by Tomlyn® is an antiseptic, anti-itch spray that calms, soothes and temporarily relieves pain and itching caused by insect bites and other minor allergic problems in dogs. It also helps prevent infection in minor cuts, scrapes and burns.

Hot Spot Spray with Bittran™ II (a safe, bitter substance that discourages animals from licking and biting irritated areas) can be used daily to help control compulsive scratching and spot chewing problems in dogs. Hot Spot Spray adheres easily to the skin (no messy run-off) and vanishes, leaving your dog's skin and coat dry and non-sticky.

DIRECTIONS:

Spray on localized irritated areas as required. Dogs who are highly allergic should be bathed regularly for optimal skin and tissue health.

PRECAUTIONS:

Consult your veterinarian immediately if swelling occurs, or if redness and irritation persist for five days or more. Avoid contact with eyes. Avoid excessive application. Do not apply to entire body or to large areas of broken skin. Wash hands after use.

FOR EXTERNAL ANIMAL USE ONLY.

DO NOT USE ON CATS.

KEEP OUT OF REACH OF CHILDREN AND PETS.

ACTIVE INGREDIENTS:

Lidocaine hydrochloride	2.4%
Benzalkonium chloride	0.1%

Compounded in a vanishing liquid base containing PEG-75 lanolin, aloe vera gel, allantoin and denatonium benzoate (Bittran™ II), among other ingredients. Stabilized at a pH of normal animal skin.
