

LIDOCAINE 5%- lidocaine patch
Central Packaging

Patch - A drug delivery system that often contains an adhesive backing that is usually applied to an external site on the body. Its ingredients either passively diffuse from, or are actively transported from, some portion of the patch. Depending upon the patch, the ingredients are either delivered to the outer surface of the body or into the body. A patch is sometimes synonymous with the terms 'extended release film' and 'system'.

NDC 42858-118-30

Lidocaine Patch 5%

DIRECTIONS FOR USE

Do not store patch outside the sealed envelope.

Cut the envelope along the dotted line. Patches may be cut into smaller sizes with scissors prior to removal of the release liner. Safely discard the remaining unused pieces of cut patches where children and pets cannot get to them.

Remove the transparent release liner (clear plastic backing) before application of patch to the skin.

Apply immediately after removal from the protective envelope.

Apply the prescribed number of patches, only once for up to 12 hours within a 24 hour period. Remove patch if irritation occurs.

Placement of external heat sources, such as heating pads or electric blankets, over Lidocaine patches is not recommended.

Lidocaine patch 5% may not stick if it gets wet. Avoid contact with water, such as bathing, swimming, or showering.

Fold used patches so that the adhesive side sticks to itself and safely discard used patches or pieces of cut patches where children and pets cannot get to them.
