Dermachlor 2%

Chlorhexidine Gluconate 0.2%

Use

FOR VETERINARY USE ONLY

KEEP OUT OF THE REACH OF CHILDREN

Properties:

For dermatological conditions in dogs, cats and horses, where an antiseptic, antimicrobial, antifungal formulation would be beneficial. Gentle enough for routine cleansing and deodorizing of animals without dermatological conditions.

Dermachlor 2% Shampoo contains 2% Chlorhexidine Gluconate in a fragrant, lathering base which combines surface-active and surface-penetrating agents along with coat conditioners for optimal therapeutic effectiveness. This is a mild shampoo that is sulfate-free and maintains the original color of your pet's coat.

Directions for Use:

Wet the coat thoroughly with water. Apply enough Dermachlor 2% Shampoo to one area to allow a mild lather to develop when worked into the coat. Continue to lather additional areas until the entire coat is treated. Allow to stand on the coat for 5 minutes before rinsing thoroughly with water. Repeat if necessary.

Precautions:

For External Use Only.

Caution: Use As Directed By Your Veterinarian.

Storage: Store at controlled room temperature.

Package Labeling:

DERMACHLOR 2% SHAMPOO

A Sulfate-Free Antiseptic Antifungal Shampoo
Containing Chlorhexidine 2%
For Use on Dogs, Cats and Horses

Net Contents: 1 Gallon
