Natural E-300

(300 IU vitamin E per mL)

INJECTABLE TOCOPHEROLSTERILE SOLUTION

KEEP OUT OF REACH OF CHILDREN

Dosage and Administration:

Intramuscular or subcutaneous administration only. May be repeated as needed. If dose is greater than 5 mL, equally divide the dose and inject at two different sites.

SUGGESTED DOSAGE:

	mL	International Units (IU)
SWINE		
Sows and Gilts		
2 wks pre-partum	4-6	1200-1800
2 wks pre-breeding	4-6	1200-1800
Pigs		
At birth	1-2	300-600
At weaning	2-3	600-900
CATTLE (Dairy and Beef)		
Cows and Heifers		
2-3 wks pre-partum	8-10	2400-3000
At calving	8-10	2400-3000
Calves		
At birth	4-6	1200-1800
At weaning	4-6	1200-1800
Yearlings	5-6	1500-1800
SHEEP		
Ewes		
2-3 wks pre-partum	4-5	1200-1500
At lambing	4-5	1200-1500
Lambs		
At birth	2-3	600-900
At weaning	2-3	600-900
Finishing lambs	3-4	900-1200

FOR ANIMAL USE ONLY

Natural tocopherols in feedstuffs can be destroyed through process, ensiling and storage. A reduced vitamin E intake can result in marginal deficiencies that may not be visible. Intramuscular or subcutaneous injections offer an efficient and rapid method to increase vitamin E status of animals.

INDICATIONS

Vitamin E-300 Injectable Tocopherol (natural-source vitamin E) is a clear, sterile, water emulsifiable solution of d-alpha-tocopherol for use as an aid in the prevention and treatment of vitamin E deficiencies in swine, cattle and sheep. This product is intended

as a supplemental source of natural vitamin E.

Each mL contains:

Active Ingredient: 300 I.U. of vitamin E (as d-alpha-tocopherol, a natural source of vitamin E); **Inactive Ingredients:** Com-pounded with 2% benzyl alcohol (preservative) in a water emulsifiable base.

Warnings:

Do not add water to this solution. Do not exceed recommended dosage. Occasionally, anaphylactic and allergic reactions occur; treat immediately with epinephrine or antihistamines.

Store at controlled room temperature. Protect from light.
